CAREER OBJECTIVE:

To pursue a challenging career and be a part of a progressive organization that will allow me to enhance my knowledge and utilize my skills to contribute to the growth of the organization.

PROFESSIONAL SUMMARY:

-
- 2.5 years of experience as a Software Test Engineer with both Manual and Automation experience.
 - Hands-on Experience with Java, Selenium, Cucumber, TestNG, JUnit, Data-driven, and POM.
 - Good experience in writing X-paths to identify web elements
 - Experienced in Developing Automated Test Scripts by using Selenium Web Driver.
 - Designed and Implemented automation frameworks such as Cucumber, TestNG, and JUnit Framework using selenium Web-Driver
 - Good experience in Agile/Scrum methodologies and procedures.
 - Participated in all the meetings of Agile-Scrum Methodology.
 - Experience in GIT Code Management Tools and Defect Management Tools like Jira.
 - I have Good Knowledge in the Build Management Tool which is in the Maven build tool.
 - Well-versed with all stages of Software Development Life Cycle (SDLC), Software Testing Life Cycle (STLC) & Bug Life Cycle (BLC).

TECHNICAL SKILLS:

Functional Tool	: Selenium, Web Driver
Programming Languages	: Java
Framework	: BDD (Cucumber), TestNG, JUnit, POM
Version control	: Git
Build Tools	: Maven
Defect Management Tool	: JIRA
Methodology	: Agile Methodology
Methodology Integration Tool	: Jenkins

PROFESSIONAL EXPERIENCE:

PROJECT 1:

Swag Tech Solutions

May 2023 – Present

Software Test Engineer
Chennai, Tamil Nadu

Project Title : Etsy

Project Type : E-Commerce Domain

Tools Used : Automation Testing

DESCRIPTION: Etsy is an American e-commerce company focused on handmade or vintage items and craft supplies. The company is headquartered in Brooklyn New York City, US.

RESPONSIBILITIES:

- Analyze the Requirements in BRD documents (Business Requirement Specifications) and clarification will be raised to our project business analyst.
- Involved in the Preparation of Test Procedures, Test Plans, Test Scenarios, Test Cases, and Test Data.
- Develop and implement strong automation frameworks using Selenium WebDriver with Java for effective automation testing of web-based applications.
- Design and develop automation scripts using Selenium and Cucumber (focusing on a behavior-driven development approach).
- Design a full data-driven framework, using POM design patterns to help in simplified and expandable automation script creation.
- Use the skill of writing X-paths to identify web elements correctly and improve test scripts.
- Using Jira, ensure that there's no difficulty when it comes to tracking and reporting, detailing all the problems found, and working hand and hand with the engineers to solve any automation issues that may arise.
- Carry out different forms of testing including smoke, sanity, and regression testing with a focus on bug fixing, defect tracking, and fault correction to bring about high product quality.
- Attend agile-scrum meetings and provide inputs and updates on automation testing progress, participate in sprint planning, review, and retrospectives.
- Executed test cases using the TestNG framework.
- Creating Reusable methods for maintainability.

PROJECT 2:

Capgemini
Associate Software
Chennai, Tamil Nadu

Nov 2022 – May 2023

Project Title : AT&T

Project Type: Networking Domain

Tools Used :Manual Testing

DESCRIPTION: AT&T(HUMAX) is a networking-based domain. We have used various networking protocols and also support VOIP, IPV6, and security firewalls.

RESPONSIBILITIES:

- Analyze the requirements in BRD documents and clarification will be raised to our project business analyst.

- Prepare a test plan, scenario, and case review with the team.
- Creating reusable methods for maintainability.
- Defect reporting and daily status reporting are done using JIRA.
- Participated in all Agile Ceremonies-Planning, Daily Standup/Scrum call, Sprint,Review, and Sprint Retrospective.
- Preparing Test Execution reports and Defect reports.
- Involved in documentation of the steps that have been followed during the testing process.
- Communicate and provide timely updates with the Test Manager in status meetings. ➤
Reviewing all the failures in daily build and preparing the document with screenshots of the issue reported and sent to the client.
