

SUMAN

SOFTWARE DEVELOPER

PROFILE

Experienced Full Stack Developer with a diverse skill set in front-end and back-end technologies. Proficient in .NET framework for front-end development and have created dynamic user interfaces. Strong back-end development skills using Spring framework including Hibernate and MyBatis for database management. Seeking challenging opportunities to leverage my skills and contribute to innovative projects.

WORK EXPERIENCE

FULL STACK DEVELOPER - ERICSSON

2021 - PRESENT

- Contributed to the Integrated Service Flow (ISF) project, a software platform aimed at managing efficient phases of service flow including establishment, execution, monitoring, tracking, and reporting.
- Created multiple APIs and UI pages tailored to specific requirements.
- Implementing efficient code with a strong foundation in Java and Object-Oriented Programming (OOP) concepts.
- Proficient in utilizing Spring Core, JPA (Java Persistence API) and Spring Boot for robust and scalable backend development.
- Developed REST API's using Hibernate and MyBatis.
- Used Azure Services like Blob Storage, Log Analytics, Application Insights, Service Bus, Key Vaults, App Services and API Management.
- Database management proficiency in MySQL, Oracle and SQL Server Management Studio (SSMS).
- Utilized .NET framework for frontend development encompassing JavaScript, C#, HTML and CSS.
- Collaborated closely with quality assurance teams to identify and resolve defects ensuring the delivery of high-quality software.
- Optimized API performance to enhance overall efficiency and responsiveness.
- Learning React for dynamic user interface construction.
- Worked on Graph API's and Microservices.
- Developed and supported implementation of business solutions.
