PROJECTS

🖥 MPS-Mans Power Solution
•A comprehensive job portal project aims to create a user-friendly platform where job seekers can search for employment opportunities across various industries and locations. It also provides features for employers to post job listings, manage applications, and streamline the hiring process.
•The portal includes user registration, profile creation, resume upload, search filters, job application submission, notifications, and admin tools for site management. The project prioritizes security, scalability, and a responsive design for seamless user experience on different devices.

🖥 Go 4 Wealth
It is a smart algorithm helps with fit-to-you customized plans and recommends research-based top fund to meet your objective. This project involves linking different banking platforms, such as core banking systems and online banking portals, to enable smooth communication and data exchange between them.

• Developed a smart algorithm that customizes plans and recommends top funds to meet user objectives based on research-driven analysis.

• Designed and executed CRUD operations for the Investment and Portfolio modules within the project. Linked core banking systems and online banking portals for seamless data exchange, enabling smooth integration between platforms.

🖥 THINK
• End-to-end, cloud-based integrated platform suite to enhance your overall content management and delivery experience.
