## PERSONAL PROJECTS

### Restful API's using SpringBoot

- Empower your business with our comprehensive Spring Boot APIs, offering versatile management capabilities for customers, employees, stock, and accounting. Simplify operations and enhance productivity across the board.

### Video Calling App

- It's an Android App made up by using Java, XML, HTML, and CSS.
- The app utilizes WebRTC (Web Real-Time Communication) technology for seamless peer-to-peer video and audio communication.

### Cryptocurrency App

- This is Android App Project. Helps user to check latest Cryptocurrency rates, user can also add the cryptocurrency in his watchlist.
- I have used Kotlin and XML to build this project.
