## **PROJECTS**

- |   |  |
|---|--|
| <ul style="list-style-type: none"><li>• <b>EMS &amp; SMS</b></li></ul> <p>Developed an Employee Management System (EMS) and School Management System (SMS) using Java. EMS manages employee data, attendance, and payroll,while SMS handles student records, grades, and class schedules. Both systems are optimized for efficiency .</p> <ul style="list-style-type: none"><li>• <b>Dehati IT Solution</b></li></ul> | <p><b>(April 2023 -August 2023)</b></p> <p><b>(Nov 2023- Mar 2024)</b></p> |
|---|--|

Developed the Dehati IT Solutions website using Bootstrap, HTML, CSS, SCSS, and JavaScript. The project focused on creating a responsive, user-friendly design for the software company, showcasing their services and solutions with smooth interactivity and modern UI features.

- **My Portfolio**

**(June 2024-July 2024)**

Created a personal portfolio using HTML, CSS, SCSS, JavaScript, and Bootstrap. The portfolio showcases my skills, projects, and achievements with a responsive and modern design, providing an interactive user experience across devices.

- **Dehati Fashion**

**(Sept 2024 - jan 2025)**

Developed Dehati Fashion, an e-commerce platform, using Angular 18 for a dynamic front-end, .NET Core for backend services, and SQL Server for data management. The platform offers a seamless shopping experience with fast performance, secure transactions, and easy product management.

- **Free Notes**

**(jan 2025 - present)**

Developed Free Notes, a platform that provides free notes in PDF format for various sectors and subjects. Built using Angular 18 for the front-end, .NET Core for backend services, and SQL Server for data storage, offering users easy access to a wide range of educational resources.
