SAURABH MAURYA

JAVA DEVELOPER

6391548988 | mauryasaurabh49712@gmail.com | Noida Sector 58 India | www.linkedin.com/in/saurabhm1

SUMMARY

Java Developer with 2+ years of experience in building scalable applications using Java, Spring Boot, MySQL, and Hibernate. Proficient in designing RESTful APIs, implementing Spring Security, integrating payment gateways like Razorpay, optimizing performance with Redis caching, and using Kafka for event-driven systems. Strong expertise in low-level design and enhancing application efficiency through robust backend solutions.

EDUCATION AND CERTIFICATION

BCA | Shyam Lal College, IGNOU   2023
Java Master Class | Udemy   2022

SKILLS

- Java
- MySQL
- Debugging
- Spring boot
- Junit
- C/C++
- Maven
- Data Structure
- JPA
- Hibernate
- Kafka
- Redis
- Low Level Design
- Spring AOP
- Jira
- Spring MVC

EXPERIENCE

Java Developer | Shilsha Technologies   **Jan 2023 – April 2025**

- Performed thorough code reviews to ensure adherence to best practices, maintain code quality, and improve overall system performance.
- Optimized application performance by identifying and resolving bottlenecks, resulting in a 20% improvement in system responsiveness.
- Led the integration of third-party APIs and external services to enhance product functionality and meet client requirements effectively.

PROJECTS

CA for Booking & Accounts | Java Developer   **Jan 2023 - Sept 2023**

Developed an account tracking system to manage monetary services, streamline reporting, and enhance accessibility. Enabled document uploads for seamless collaboration between clients, Chartered Accountants (CAs), and their teams.

Key Achievements:

- Boosted payroll efficiency by 80% through streamlined workflows.
- Increased team productivity by 60% with IT solution integration.
- Improved service tracking, ensuring 100% transparency for admins and clients.

Technologies: Java, Spring-boot, JPA, Hibernate, MySQL, React

Responsibilities:
- Designed and implemented JWT-based authentication and authorization to secure REST APIs.
- Developed APIs for user registration, login, and secure data access.
- Created a custom security filter to validate JWT tokens and manage user sessions.

eBench | Java Developer   Oct 2023 – Sept 2024

At eBench, I contributed to a **B2B and B2C hiring platform** designed to streamline the hiring process for businesses and enhance the candidate experience. The platform provided a seamless and efficient system for managing candidate profiles, job applications, and client interactions. I was responsible for developing core backend features, ensuring system stability, and enhancing overall platform performance.

Key Achievements:
- Developed a file upload/download module using Amazon S3 bucket and REST APIs.
- Improved login/logout functionality, enhancing user authentication and experience.
- Optimized backend performance, reducing API response time by 15%.

Technologies: Java, Spring Boot, JPA, Hibernate, MySQL, React

Responsibilities:
- Developed and maintained backend modules to enhance platform functionality.
- Implemented a file upload/download system using REST APIs.
- Improved user authentication by optimizing login/logout functionality.

Swabi | Java Developer   Oct 2024 – March 2025

Developed a travel-based application providing users with travel packages and activities. Users could book travel services and rent vehicles at specified prices for single or multiple locations.

Key Achievements:
- Simplified travel bookings, increasing user satisfaction by 50%.
- Optimized package and activity searches, reducing response time by 25%.

Technologies: Java, Spring Boot, JPA, Hibernate, MySQL, React

Responsibilities:
- Designed and implemented REST APIs for dashboard sub-modules.
- Managed and enhanced the login and logout modules for secure authentication.
- Improved database performance for travel package and activity modules.
