📂 PROJECTS

Netflix Website Landing Page clone |Html,Css,Javascript|
Create Netflix Clone Using HTML, CSS, and JavaScript with Source Code.We create a Complete Netflix clone to knowing about the working process of the online platform developed using Codng. Also, we can add movie names, cast actors, a description of the movie, etc.Behalf of Landing pages is one of the good practices to get a practical experience of responsive design and the most popular OTT Netflix Clone landing page is created in this project.

QR Code Generator |Html,Css,JavaScript|
This QR code Generator can make QR Code any Text or link. you will get the QR Code in Image formate. We will make it using HML CSS and javascript QR (Quick Response) codes are capable of storing lots of data, and users can easily access the information by scanning the QR code. In my QR Code Generator app, users can enter a text or URL to generate a QR code for it. It is a QR code generator app, not a QR code scanner.

Analog Clock | Javascript,Html,CSS |
We will create ad design a dark with glowing effects analog clock using basic code of html,css,and javacsript. first we will create from the our analog clock using html code by adding numbers and hands of the clock simple css design.then we will add a functionality to make the work by adding javascript code

Portfolio |Html, Css|
My basic Portfolio project which is developed in HTML CSS platform. This is simple and basic level small project for learning purpose.This software code helpful in academic projects,We have a great collection of HTML CSS projects.
