Aim to work in a challenging work environment where I can utilize my expertise in resolving the problems in test-plans and advocate my knowledge and skills towards the growth of the organization.

PROJECTS

LAST YEAR COLLEGE PROJECT

Teeth Disease Detection System

- Developed a Teeth disease Detection application using Convolutional Neural Networks (CNN) in the Spyder IDE. The application is designed to accurately detect disease real time.
- The frontend of the application was implemented using Tkinter, providing a user-friendly interface for interaction.
- Python served as the backend programming language.
- The system utilized SQLite as the database for storing relevant information and statistics.

BACKEND PROJECT

Basic Custom Redis CLI

- In this project i have create basic **Custom Redis CLI** using **node js**.
- I have create only two module of command **SET** and **GET**. Further I am working on next part of this projects.
