PROJECTS

In my role, I've spearheaded over 35+ Shopify projects, encompassing custom themes, app integrations, and optimizations, while seamlessly integrating third-party APIs for payments, shipping, and marketing automation. Ensuring the continued success of Shopify stores through ongoing support is paramount. Additionally, I've contributed to more than 20+ custom development projects, leveraging technologies like MongoDB, Express.js, React.js, and Node.js. From web apps to e-commerce platforms, I've collaborated on various projects, delivering on-time solutions within budget constraints, always maintaining high code quality. **Few projects mentioned below:-**

Traya Health (https://traya.health/)   **2021 – Present**

Designed and developed a responsive e-commerce site for Traya Health using Shopify, Bootstrap, and jQuery. Managed website maintenance, updates, and backups. Integrated APIs and Custom features. Improved performance with JavaScript by implementing lazy loading of images and dynamic content loading.

Blackberrys (https://www.blackberrys.store/)   **2022 – Present**

I created a flow for the Blackberry project using Shopify APIs, React, Node.js, MongoDB, react-pdf, and Express.js. This involved developing a model to generate Product Catalog PDFs, including features for image editing and customization.

ONDC Seller App   **2022 – 2023**

I built a marketplace platform where vendors register, upload products, and manage shipping. Customers browse, order, and track shipments, fostering smooth transactions and communication.

Lakme India (https://www.lakmeindia.com/)   **2021 – 2022**

Managed website maintenance, updates, and backups. Features included product listing, details, cart, checkout and Custom features. Improved performance with JavaScript by implementing lazy loading of images and dynamic content loading.
