---

## PROJECTS

### The Frustrated World Website -

- **Description:** Developed an interactive platform where users can anonymously express their feelings through text, messages, and music, fostering a supportive community environment.
- Designed and implemented the user interface using HTML and CSS, ensuring a responsive and intuitive experience.
- Integrated JavaScript to enable dynamic interactions and user input handling, enhancing user engagement.
- Collaborated with team members to brainstorm features and functionalities that cater to user needs effectively.
- Ensured the website's compatibility across various browsers and devices, optimizing performance and user accessibility.

### The Service Squad Website –

- **Description:** Conceptualized and led the development of a comprehensive platform offering essential services tailored for urban environments, enhancing convenience and accessibility.
  - Conceived to address urban living challenges by providing essential services within metropolitan areas.
  - Led the project as progenitor and lead, responsible for the entire lifecycle from ideation to implementation.
  - Utilized a tech stack including HTML, Bootstrap, JavaScript, React.js, Node.js, and PostgreSQL.
  - Ensured seamless integration of technologies to enhance service delivery and user experience.
-
