## Profile Summary

---

Creative and detail-oriented Front-End Developer skilled in building dynamic, responsive web applications using HTML, CSS, JavaScript, and React. Passionate about delivering seamless user experiences and continuously learning to stay ahead in the fast-evolving world of web development.

## Experience

---

### Bharat Intern

March 2024 – April 2024

*Front End Developer*

*Bhopal*

- Engineered a sophisticated portfolio website to effectively showcase technical expertise and project accomplishments, demonstrating a high level of design and development proficiency.
- Developed a dynamic weather application featuring real-time data integration using APIs, significantly improving user engagement and experience.
- Utilized HTML, CSS, and JavaScript to drive project development, enhancing proficiency in front-end technologies, and refining skills in design, implementation, and responsive web architecture.

## Projects

---

### Portfolio Website | *React, CSS, JSX* | GitHub

July 2024

- Designed and built a dynamic portfolio website from scratch using React.js, showcasing my skills, projects and achievements
- The website features a modern, responsive design, easy navigation, a contact form and interactive elements providing a seamless user experience.
- Leveraged React's capabilities to create a visually appealing and functional platform that effectively highlights my front-end development expertise.

### Weather App | *HTML, CSS, JavaScript and API Integration* | GitHub

March 2024

- developed a dynamic Weather App using HTML, CSS, and JavaScript, incorporating API integration for real-time weather updates.
- Access instant, real-time weather updates for cities worldwide and Enjoy an intuitive, responsive design with smooth transitions across all devices.
- Harness accurate weather data through the OpenWeather API, Quickly get weather information by entering a city name, with minimal effort required.

### IMDB Clone | *HTML, CSS, JavaScript and API Integration* | GitHub

February 2024

- developed an IMDB Clone using HTML, CSS, and Vanilla JavaScript, replicating the core features of the acclaimed IMDB platform.
- This web application offers users a sleek, user-friendly interface to effortlessly search for movies and TV shows. Users can access detailed information including cast, ratings, and reviews, all within an engaging and responsive design.
- The project showcases my ability to create intuitive, high-quality web applications that deliver an optimal user experience.
