Professional Summary

Frontend Developer proficient in **React.js** and **Tailwind CSS**, with experience in building responsive and scalable web applications. Familiar with backend development using **Express.js** and **MongoDB**. Skilled in API testing with **Postman**. Strong team collaborator with ability to deliver projects aligned with business goals. Open to remote opportunities with flexible hours.

Technical Skills

- **Frontend:** HTML, CSS, JavaScript (ES6+), Tailwind CSS, React.js, React Router, Redux Toolkit
- **Backend (Familiar):** Express.js, MongoDB, Postman
- **Tools & Platforms:** Git, GitHub, VS Code, Netlify, Vercel
- **UI/UX & Design:** Figma, Responsive Design, User Flow Design

Professional Experience

Frontend Developer Intern

Brillica Services Private Limited, March 2023 – August 2023

- Developed responsive, user-friendly interfaces using React, Tailwind CSS, and modern frontend technologies.
- Collaborated on UI/UX design improvements and implemented features with clean, maintainable code.
- Integrated secure payment gateways and created dynamic pages for policies and refunds.

Frontend Developer (Open Source Contributor)

rtCamp / frappe-appointment, April 2025

- Improved navigation UX by adding a responsive Back/Home button to the booking component in the appointment system, enabling smooth navigation from individual appointment pages to the main appointment overview.
- Enhanced UI consistency across device sizes using React and TypeScript, maintaining alignment with app design standards.
- Worked collaboratively with project maintainers to iterate based on feedback and ensure a seamless user experience.
- Conducted testing to ensure navigation history synchronization and usability.
- GitHub PR #199 - <https://github.com/rtCamp/frappe-appointment/pull/199> ↗

Projects

RouterVault ↗

March 2025

- Built a multi-page web application using **React.js** and **React Router**, with nested routes and loader-based data fetching.
- Implemented secure **authentication** using **localStorage** to manage user sessions and restrict access to protected routes.
- Integrated a **live GitHub user search feature with React Router loaders**, improving user interactivity.

Live Cricket Score ↗

February 2025

- Developed a responsive web app in **React.js** that fetches and displays real-time scores for ODI, T20, and Test matches.
- Applied advanced UI interactions including **3D hover effects** on match cards to improve visual appeal.
- Handled loading states and errors gracefully to enhance user experience.

iTask Manager ↗

January 2025

- Developed a full-featured task management app using **React.js** and **Tailwind CSS** with support for CRUD operations.
- Enabled persistent task storage using **localStorage**, ensuring data retention across sessions.
- Designed a clean, mobile-friendly UI for easy task addition, editing, and deletion.

Education

Uttarakhand Technical University

August 2020 – May 2024

Bachelor of Technology (B.Tech) in Computer Science and Engineering, Dehradun

Achievements

- First Runner-up, **Incubate India Hackathon 2021 (GitHub-powered)** – Developed “ScanIT” virus tracker
- First Runner-up, **Inter College Tech Talent Hackathon 2023** – Created a memory game using React
