WORK EXPERIENCE

Big Oh Tech (01/2022 - Present)
Associate Software Engineer

PROJECTS

Transaction Feedback Website (03/2022 - 05/2022)
- It is a Feedback System with customized feedback forms as per requirement of hotels.
- Used libraries like **React hook Form, React Query and Redux Toolkit**.
- My role in this project was to create matelial components such as text fields ,select , file upload ,radio buttons as per as UI requirement of project.

Microsite Builder (05/2022 - Present)
- It is an application that helps businesses in the hospitality industry to bring their business online within 10 minutes with help of a website that can be tailored by business user according to their taste.
- Workerd as Front end developer on this project , used **NextJs , Redux Toolkit ,Type script ,Material UI ,React Hook Form ,CK Editor ,React Multi Carousel** and many more technologies for this project.
- My contribution to this project is making pixel perfect UI designing ,creation of multiple components , creation of countless forms ,integration of forms with microsite using redux toolkit ,created dynamic filed renderer and much more.

FCT (10/2022 - Present)
- FCT is a canada based company which provides insurance and real estate services in Canada.
- Tech stack used for this project is **ReactJs, HTML5, CSS3 ,Material UI ,Redux Toolkit** and much more.
- For me a key learnig for this project is how to deal this client and manage things accordingly.
- Implemented features some major features like **Google Captcha ,Stripe Payment Gateway.**
