React js

PROJECTS

Ecommerce Clone Amazon

📅 11/2022 - 02/2023   📍 Location

Develop a web-based platform that replicates the essential features and functionality of Amazon's online shopping platform

- Create a user-friendly interface that mimics the layout and design of Amazon's website
- Include a variety of product categories, such as electronics, clothing, home and garden, health and beauty, and more
- Develop a powerful search engine with filters and sorting options to help users find products quickly and easily

Spotify Clone

📅 Date period   📍 Location

A Spotify Clone in React is a music streaming platform that replicates Spotify's essential features using React. It features a user-friendly interface with a powerful search engine, music recommendations, and payment method support. The platform integrates with music licensing services to ensure legal use. The team of developers, designers, and testers work to launch a fast, responsive, and scalable platform. The main focus is to create an enjoyable and seamless listening experience for users.

- Music streaming platform built using React framework
- Replicates essential features and functionality of Spotify
- Strong focus on using React framework to create a fast, responsive, and scalable platform.
