PROFESSIONAL SUMMARY

Dynamic and motivated Computer Science graduate seeking a challenging position in the field of software development, where I can apply my knowledge, skills, and passion for technology to contribute to innovative projects while continuously learning and growing as a professional.

PROJECT

E-Commerce Website (Java, MySQL):

Developed a fully functional e-commerce website using Java Servlets, JSP, and JDBC for backend operations.
Implemented features including user authentication, product catalog management, and shopping cart functionality.
Integrated MySQL database for storing and retrieving product information and user data.

Personal Portfolio Website (HTML, CSS, JavaScript):

Designed and developed a responsive personal portfolio website using HTML, CSS, and JavaScript.
Incorporated animations and interactive elements to enhance user experience.
Hosted the website on a web hosting platform for public access.
