RELEVANT PROJECTS

NavigatorsRus(E-Commerce)

Full Stack Developer | 05 October, 2023 - 10 January, 2024
- Proficient in Node.js, React.js, Express.js, Socket.io, Agora, Firebase, MySQL, Bootstrap, and MVC.
- EIntegrated features such as product listings, cart, checkout, and inventory management.
- Implemented the Dependency Injection design pattern via Awilix.
- Developed an online vet consultation platform using **Agora** and **Socket.io.**
- Synchronized master data, products, customers, and orders across systems.
- Utilized JSON, XML, and third-party REST APIs for seamless data exchange.

Sparess(B2B)

Full Stack Developer | 15 , February 2023 - 05 August, 2023
- A B2B business application can be built using **React, Node.js**, and **MySQL.**
- Customers can buy items listed by sellers who have been verified by the platform.
- Sellers can list their products for sale after our system has completed a verification process.
- Video calling is integrated with **Agora**, which allows sellers and buyers to communicate more fluently.
- By using Socket.io and authorization, we can create a custom chat feature in this application that allows buyers/sellers to communicate with each other in real-time, and only authorized users can access the application.

VAR Clinic

Full Stack Developer | 10 June, 2023 - 24 November, 2023

- A UAE project enabling users to find the best doctors, book instant appointments, consultations, and make better, more informed health decisions.
- Integrated a 3rd-party video call and chat service using Twilio.
- Created APIs for most of the admin CRUD modules and integrated them as well.
- Had to reverse engineer the entire code because the old developer left the project with poor practices.

EDUCATION

January - 2024

Pursuing Master of Computer Application in Software Engineering at Amity University.

July - 2018
