OBJECTIVE

As a Software Engineer with 4 years of experience, my objective is to contribute my skills and expertise to develop high-quality software solutions. I have a strong understanding of software development principles and a proven track record of delivering projects on time and within budget. I am passionate about learning new technologies and keeping up-to-date with the latest trends in software development. I am a team player with excellent communication skills and the ability to work collaboratively with cross-functional teams. I am proficient in Nodejs, MongoDB, ReactJS, Typescript, PHP, Laravel, MySQL, and NestJS.

PROJECTS

TVS Accelerator

This is **Enquiry Management System** of TVS Motors which is developed on **MEAN** Stack. In this there are multiple roles based authentication and Enquiry Management. Also few existing systems of TVS is also integrated as 3rd Party. All the Dealers, Branch Managers, Sales Executive and Customer Care Executives use this **PWA**.

GAIA-X

This is a collaborative **Web3** project for Europe which is based on **Self Sovereign Identity** (SSI). It's backend is developed on **NestJS** Microservice based architecture where services are communicating via **NATS** and **Postgres** is database. Here **Aries Framework JavaScript** (AFJ) is used as an Agent and **Indy** is used as Ledger.

I was working on backend exposing APIs for Connection, Schemas, Credential Definition, Credential Issuance and revocation. Also created a complete NestJS wrapper for AFJ as per the requirements.

Findverdicts

This website is for Law Firms and individuals to go through the cases and their verdicts that happened in the past.

- # A user can search for the cases based on the filters(e.g. state, county, damages, liabilities etc.)

- # A user can create Case Files after login and store its related data like searches, articles etc at the same place.

- # There are passes to buy which allow the users to get more access to the resources.

- # It also has Publications which are sent to the users every month if the user pays for its subscription.

It frontend is on **VueJS** and backend is on **Node** & deployed on Firebase

NewsEpp Bizz

It is a mobile application that can be used by the newspaper vendors to:

- # Get Bookings for Newspaper in their area

- # Manage their pamphlets distribution

- # Manage their Subscribers

[https://play.google.com/store/apps/details?](https://play.google.com/store/apps/details?id=com.newsepp.newseppbiz)

[id=com.newsepp.newseppbiz](https://play.google.com/store/apps/details?id=com.newsepp.newseppbiz)

Its backend is developed on NodeJS and MongoDB is used for data persistence.

NewsEpp

It is a mobile application that can be used to:

- # Book Newspapers from your nearest newspaper vendors

- # Add "Thought of the Day"

- # Can see the relevant Advertisement.

[https://play.google.com/store/apps/details?](https://play.google.com/store/apps/details?id=com.newsepp.newsepp)

[id=com.newsepp.newsepp](https://play.google.com/store/apps/details?id=com.newsepp.newsepp)

Its backend is developed on NodeJS and MongoDB is used for data persistence.

Gramleys (gramleys.com)

It is the website of a tiffin service company which contains:

- # Login for users (Vendors and Clients)

- # Packs display a user can buy

- # Vendors' Admin panel

- # A Superadmin panel to manage the users and vendors' verification.

MERN Stack was used to develop this PWA.

MiM Essay CRM (mim-essay-crm.com)

It is the CRM of MiM Essay which contains the paid services of the company which includes:

- # Document upload & download the review by consultants
- # Analysis Sheet (for analysing the client)

It's backend was on Core **PHP**, which I translated in **Laravel** as MVC Application.

MiM Essay (mim-essay.com)

It is the main website of the MiM Essay which contains information regarding the company and their services. They provide some tools like Profile Evaluation and School Selector.

Its backend was on **Laravel**.
