Vaibhav Rajput

Summary

Backend developer with 2+ years of expertise in Node.js and Nest.js, skilled in MySQL, MongoDB, and PostgreSQL. Specializes in architecting robust and scalable server-side solutions. Proficient in AWS for secure cloud deployments. Collaborative team player focused on backend development, contributing to the integration of efficient and maintainable solutions and delivering high-performance backend systems. Diligent in staying updated on industry trends and adopting best practices for reliable application development.

Experience

Innovura Technologies - NodeJs Developer

Ahmedabad, India

02/2022 - Current

- Handling the backend business logic of applications
- Major responsibilities are database setup and writing APIs which interact with front-end
- Develop whole backend from understanding requirement and creating a Database structure to creating Middleware/Apis to deploying a project
- Deploying applications on cloud platforms like AWS or Azure using Node.js serverless architecture and also using managed servers like ec2 instances
- Work as part of a team developing applications and services using Agile development methods
- Outside of development, I actively engage in client demonstrations, offering a clear insight into project progress.

Nettyfy Technologies - Software Developer Intern

Ahmedabad, India

08/2021 - 01/2022

- Developing and learning application in node js with backend and frontend implementation
- Collaborating team in debugging and solving bugs.

Education And Training

Bachelor Of Engineering:

Computer Engineering

Aditya Silver Oak Institute Of Technology

Ahmedabad

Projects

- Project 1: TradeBridge
- Role: Backend developer

Collaborated with a cross-functional team to implement a scalable and responsive e-commerce web and mobile application using NestJS. Streamlined internal processes by developing a comprehensive admin panel for efficient management of products, orders, and user data.

- Project 2: Royale Touche Multi-User Platform
- Role: Backend developer

Spearheaded the development of a versatile multi-user platform for Royale Touche, accommodating diverse user bases, including salespersons, architects, carpenters, and dealers. The consolidated platform serves over 100,000 professionals.

Developed a scalable backend infrastructure using Node.js and Express.js. Integrated RESTful APIs for seamless communication with the sales mobile app.

Managed a user base exceeding 100,000, ensuring high performance and responsiveness.
