## EDUCATION

### GLA University

*Bachelor's Of Technology In Computer Science*

Mathura, UP, India

Aug. 2020 – Jul 2024

### St. Andrews Sr. Sec. School

*Intermediate*

Agra, UP, India

Apr. 2019 – May 2020

## EXPERIENCE

### Engineer Trainee

*Psiborg Technologies*

Apr 2024 – Present

Noida, Uttar Pradesh

- Proficient at using React.js with MUI for creating responsive website design.
- Skilled in creating MUI responsive dashboards with different dynamic themes.
- Tested the developed website as well to assure the quality of developed product..

### Web Developer Intern

*Agumentik group of Companies*

Nov 2023 – Feb 2024

Bangalore

- Developed responsive and visually appealing web pages using HTML, CSS, and bootstrap framework, ensuring optimal user experience across various devices.
- Implement dynamic website features using PHP, enhancing user engagement.

### Value Added Course

*Web development*

Jun. 2022 – Jul 2022

Mathura

- Developed the project under the guidance of Mr. Pankaj Kapoor.
- I learned different languages like HTML, CSS, and JavaScript.
- Used different methods to create responsive websites and how to implement the learnt technologies in the project.

## PROJECTS

### E-Commerce Web App / Nodejs, Reactjs, Expressjs, MongoDB, JavaScript

May 2024 – Present

- Developed a secure e-commerce platform using the MERN stack, featuring robust authentication mechanisms, token management for seamless user experience, and efficient pagination for handling large datasets.
- Implemented user-friendly features including registration, login, and a responsive shopping cart system allowing users to add, remove, and modify products securely.
- Utilized role-based authentication to grant specific privileges to users, enabling sellers to manage products, prices, and sales via a dedicated dashboard, while admins oversee the platform's operations.

### Chatify/ Reactjs, Nodejs, Reduxjs, Expressjs, MongoDB, Javascript

Feb 2024 – Present

- Skilled in developing cutting-edge social networking platforms like Chatify using the MERN stack, with Socket.IO integration for real-time communication features.
- Proficient in creating interactive user interfaces with React.js and implementing robust backend APIs using Node.js/Express.js, ensuring seamless user experiences and efficient data handling.
- Experienced in building essential social networking functionalities such as user authentication, profiles, posts sharing, likes, comments, and notifications, fostering user engagement and connectivity.

### Teacher-Student Appointment Portal/ HTML, CSS, JavaScript, PHP

Oct 2022 – Nov 2022

- Designed the website for daily finding the solutions of daily problems of the student.
- Students get their particular Id and password for login and then file a complaint to the particular teacher.
