EXPERIENCE SUMMARY

Senior Software Developer with 4+ years of progressive experience in back-end development, API integration, and cloud solutions. Specialized in C#, Java, .NET frameworks, and Azure. Proven track record in driving technical projects from conception to completion, optimizing processes, and ensuring seamless deployments using CI/CD pipelines. Adept in agile methodologies, version control, and problem-solving within high-stakes environments.

PROFESSIONAL EXPERIENCE

Senior Software Developer
Fleek IT Solutions | April 2023 – Present

- Spearhead the development of cutting-edge REST APIs, resulting in a 30% reduction in API response time.
- Manage the full software development lifecycle, from initial requirements gathering to deployment, significantly improving code quality and system performance.
- Lead a team of developers in the integration of Salesforce, streamlining client workflows by 25%.
- Implement CI/CD processes using Azure DevOps, automating deployment pipelines, reducing manual errors by 40%.

Software Developer
Fleek IT Solutions | October 2020 – April 2023

- Developed and maintained critical backend services for enterprise clients using .NET and C#.
- Played a pivotal role in reducing bug incidents by 20% through rigorous testing and debugging.
- Collaborated closely with cross-functional teams to deliver high-quality software solutions on time.
- Integrated cloud services and enhanced the functionality of client systems, resulting in improved scalability and performance.

EDUCATION

- **Bachelor of Engineering & Technology in Information Technology**
  Dr. A.P.J. Abdul Kalam Technical University (AKTU) – 64%
- **High School & Intermediate**
  SD Public School – 74% (High School), 61% (Intermediate)

KEY SKILLS

- **Languages**: C#, Java
- **Web Technologies**: ASP.NET, .NET Core, REST APIs, Salesforce Integration
- **Database Management**: SQL Server, MySQL, Entity Framework
- **DevOps & CI/CD**: Azure DevOps, Jenkins, GIT
- **Tools**: Visual Studio, MVC, MS SQL Management Studio, SourceTree
- **Third-Party Integrations**: MessageBird, Cloudinary, AM Charts

PROJECTS

Automation Module | *JobRock, Netherlands*

- Built an automated system that handles interview question flows and triggers communication through WhatsApp, email, and SMS, improving recruiter engagement by 35%.

Hub Module | *JobRock, Netherlands*

- Developed a centralized platform that integrates various client modules, significantly reducing the time needed to access and execute different services.

Appointment Module | *JobRock, Netherlands*

- Designed an automated appointment scheduling system based on candidate performance, streamlining the recruitment process and cutting decision time by 20%.

CV Generator | *DocBuilder, Netherlands*

Engineered an AI-driven CV generator that dynamically builds personalized CVs, enhancing user engagement and simplifying document creation for clients.

Responsibilities

- Oversaw end-to-end software development life cycle, debugged applications & configured existing systems
- Communicated with the technology managers to determine application requirements and designed the same accordingly
- Organized & attended weekly project meetings with other technical staff members, business owners, and SMEs
- Formed technical specifications & wrote codes for .NET software applications through pair programming & code reviews
- Participated in all Scrum activities including sprint planning, creating user stories, and sprint retrospectives
- Created unit tests and reviewed the development of test protocols to test applications before UAT
- Troubleshoot, debugged, and modified existing programs to improve performance
- Coordinated with the clients to understand their requirements and implement it
