PROFESSIONAL SUMMARY

- Having 3.3 years of experience as a Software Developer, actively involved in various stages of the software development lifecycle, including requirement gathering, design, estimation, and configuration, with a focus on delivering effective and reliable solutions.
- Worked with Java, J2EE Technologies including **Core JAVA, Servlet, JSP, JDBC, Spring, Spring MVC, Spring Boot, Hibernate Framework, Rest APIs using Postman** and Fair knowledge of **Micro-services architecture**.
- Comfortable working with open-source tools and technologies. Familiar with development tools like Maven, IntelliJ IDEA, VS Code, Eclipse, and Spring Tool Suite (STS).
- Familiar with **HTML, CSS, JAVASCRIPT**.
- Currently working on **BambooHR** using Spring Boot with MVC.
- Experience in implementing MVC and Singleton design pattern.
- Experience in developing and deploying applications using Apache Tomcat.
- Hands on experience in developing enterprise applications in Java.
- Enjoy working in agile teams—collaborating on user stories, designing test cases, and contributing to continuous product improvement.
- Ability to communicate with business stakeholders to set and manage expectations about delivery methods and timelines.
- Experience with relational databases and working knowledge of MySQL, including creating tables and performing basic operations.
- Familiar with Agile methodologies and comfortable working in agile environments.

DOMAIN KNOWLEDGE

- Web Application Development
- E-Commerce and Internet Services.

HARD SKILLS

Core Java
Java-8
JDBC
Servlet
Database (MySQL)
Spring
Spring MVC
Spring Boot
Version Control
Web Scripting
Application Servers
IDE
JPA
REST APIs
STS, Postman
HTML, CSS
Agile Methodology

SOFT SKILLS

Adaptability
Time Management

Good Communication
Positive Attitude
Learning Mindset
Amicable Person

TECHNICAL SKILLS

Languages: -	Core Java, JAVA-8
Java Ecosystem: -	Spring Boot, Spring MVC, Spring , Rest APIs, Data Jpa Micro- services, Hibernate, J2EE, Servlet and JSP, JDBC
Web Scripting: -	HTML, CSS.
RDBMS: -	MySQL8
IDE: -	Eclipse, STS, IntelliJ, VS Code
Application Server: -	Tomcat (8-10)
Version Control/Build tools: -	GitHub, Maven

PROFESSIONAL SKILLS

Software Engineer at **Webearn Solution Pvt. Ltd** , Noida from
Jan 2022 to till date.

1. Project: BambooHR (2023 – till date)

Team Size: 10

Role: Software Engineer

Technologies: Java, Spring
Boot with MVC, Data JPA,
Eclipse STS, MySQL
Database, Maven

Description:

BambooHR is a cloud-based Human Resource (HR) software designed to simplify HR processes for small and medium-sized businesses. It offers a centralized platform to manage employee information. The software includes features like employee self-service, automated workflows to improve efficiency. BambooHR supports recruitment through applicant tracking. Payroll and benefits administration are integrated for seamless financial management. BambooHR ensures data security and compliance with customizable user permissions. This Unified approach eliminates the need for manual data entry and time consuming workflows saving businesses hours of extra work.

Responsibility:

As a Developer, I am involved in the coding of following areas:-

- Develop essential business logic, such as employee data management, leave calculations, and payroll processing.
- Developed in writing the Bean and Entity class for the tables.
- Developed the Rest Controller classes using Spring Boot.
- Design, implement, and maintain structured databases to manage employee-related data
- Develop RESTful APIs to facilitate seamless communication between the frontend and backend systems.
- Participated in agile development practices, contributing to sprint planning, stand-up meetings and code reviews.

PERSONAL DETAIL

- DOB: 4th June 1998
- Nationality: Indian
- Current Location: Ghaziabad
- Notice Period : 15 days

EDUCATION

HI-TECH, Ghaziabad
B.Tech - 72%

- MDVPIC, Ghaziabad (12th) - 76%
- MDVPIC, Ghaziabad (10th) - 82%

2. Project: Qatar Postal Service

(2022- 2023)

Team Size: 10

Role: Software Engineer User

Technologies: Spring Boot with MVC, Eclipse STS, MySQL, Maven

Description:

Qatar Postal Service is basically refers to the courier and logistics Software solutions system, which is optimize operations by sorting, tracking and delivery of parcel and packages. They enhance efficiency by streamlining route planning, improving, package tracking accuracy, and simplifying customer interaction. The Qatar Postal Services project aimed to modernize and digitize the national postal service's backend system, facilitating efficient and scalable management of postal operations. The Project encompassed a range of services from parcel tracking to customer management and automated notifications, providing seamless integration with existing front-end systems and external third party services. I have successfully initiatives that enhance IT operations and improve overall functionality includes optimizing, and develop real-time tracking solutions.

Responsibilities:

- Developed and maintained robust Java-based backend systems to support postal services operations.
 - Developed in writing the Bean and Entity class for the tables.
 - Developed the Rest Controller classes using Spring Boot.
 - Implementing the DAO layer for access data using Hibernate.
 - Designed and implemented scalable RESTful APIs, enhancing the efficiency of package tracking and delivery management systems.
- Participated in agile development practices, contributing to sprint planning, stand-up meetings and code reviews.

DECLARATION

I confirm that the information provided by me is true to the best of my knowledge and belief...

With Regards

Vishu Goswami
