ABOUT ME

2 years of expericene as Frontend Developer, building the 'client-side' of web applications. translating customer needs into functional and appealing interactive applications.

WORK EXPERIENCE

September 2021 - Present

Excellence Technologies Pvt, Ltd. Noida

Projects

Giveplease CRM (Ongoing)   Feb 2023

https://uat.givepls.com/ ngs@givepls.com,PWD-Admin123

It is a smart donor management system,it is highly configurable we can show and hide any functionality for different-different charity as per their demand, it has lots of functionality to manage donor and edonations.
As a frontend developer i build a new functionality to manage offline donation, implemented powerbi dashboard,donor details page and currently working on donor wall functionality.

NGS (Ongoing)   Jan 2023

https://uat-donate.nationalgallery.sg/

It is a donation application where individuals and organizations can make tax-deductible donations to the Gallery, they can make donation for any causes or any ongoing campaign or they can become patron member.
It is high secure application, my role as a fontend developer is to add new configurable functionality, API integration, create reusable component using Reactjs, SCSS, Stripe.

Motobookie   Jun 2022-Dec 2022

https://pwa.motobookie.com/

It is a betting pwa application,where user has to take subscription to see all ongoing bet for an event, user can place a wager with rider and many other feature. My role as a frontend developer was to implement all functionality using react js, firebase, socket.io and stripe.

SCN   Jan 2022-May 2022

https://web.thesceneny.com/

The Scene is a one stop shop for on demand, instant personalized recommendations and guaranteed reservations at restaurants, bars, cafes and clubs in New York.
My role as a frontend developer was to create highly reusable pixel perfect components for restaurent listing and details page,added payment mehthod like googlepay, card using stripe.js.

Wake2Wake   Sep 2021-Dec 2021

https://wake2wake.ae/

It is a DUBAI(UAE) based application where user can book a boat rides in Dubai Marina,and can enjoy wake sport.
My role as a frontend developer was to create highly reusable pixel perfect components for major parts of the application, API integration using react js, redux thunk.
