CAREER OBJECTIVE

Good in C, C++, and Java, as well as experienced in web technologies like HTML, CSS, and Bootstrap. Enthusiastic about expanding expertise in new technologies, excelling in challenging environments, and contributing to organizational goals through real-world projects.

PROJECTS

Academic Certificate Verification system

Developed an Academic Certificate Verification system that authenticates certificates and generates QR codes storing all certificate information. This allows for instant and secure verification of academic credentials by scanning the QR code.

HOSPITAL MANAGEMENT SYSTEM

A project developed using Java, JDBC, and MySQL, facilitating seamless management of hospital operations. The system includes features such as patient scheduling, electronic health records management, inventory control, and staff management. Enhance hospital efficiency by streamlining processes, improving patient care, and optimizing resource utilization.

EXTRA CURRICULAR ACTIVITIES

- Participated in a Project Presentation at Shrimati Kashibai Navale College of Engineering, Pune (2023).
