EXPERIENCE

Software Developer   June 2022 – Present
DXC Technology

- Engineered a secure talent management system utilizing(MERN) React, Express, Node and MongoDB, implementing JWT tokens and role-based access control, resulting in a 30% increase in data protection.
- Designed and implemented RESTful APIs and intuitive UX for quarterly financial analysis, improving operational efficiency by 25% and reducing report generation time by 40%
- Led the development of an internal project proof of concept that incorporated dynamic collapsible designs, resulting in a 40% increase in user productivity and earning management recognition.
- Led weekly client meetings, demonstrating strong communication skills and attention to detail, resulting in a 95% client satisfaction rate and consistent on-time project delivery.

Intern   June 2021
IBM

- Developed a responsive frontend for a car rental website using HTML5/CSS3.
- Implemented Tailwind CSS and Material UI frameworks, resulting in a 50% reduction in development time and increase in user satisfaction.

EDUCATION

KIET groups of Institution, Ghaziabad   *July 2018 – July 2022*
Bachelor of Technology, 85%

TECHNICAL SKILLS

Languages: Java, SQL (Postgres), JavaScript, TypeScript, .HTML5/CSS3
Frameworks and Technologies: React, Node.js, Angular, Spring boot, Redux, Rxjs, MongoDB
Tailwind, Bootstrap, Material-UI, Angular Material
Tools and Platforms: JIRA, Figma, Postman, Figma , GitHub, Agile and CI/CD

PROJECTS

Portfolio / *React, Figma, react bootstrap, Nodemailer*   *Demo link / Source*

- Developed a full-stack web application using Nodemailer and React as frontend .
- Implemented smooth scrolling for better UX . .

Hirred / *React, NodeJS, Express, JWT, Cloudinary, Multer, CI/CD*   *Demo Link / Source*

- Developed a full-stack web application using NodeJs serving a REST API with React as frontend.
- Implemented JWT-based authentication and role-based authorization, enhancing application security and reducing unauthorized access attempts by 95%.
- Optimized performance through lazy loading, asynchronous programming, and debouncing techniques, improving overall application response time by 60%.

Pant Chat/ *React, Node, Socket.io, Firebase, SonarQube, Express, Material UI*   *Source*

- Developed a real-time chat application with Firebase authentication, achieving a 99.9% user authentication success rate and 50% reduction in data breach risks.
- Integrated Socket.IO for instant messaging, resulting in sub-second message delivery and a 30% increase in user engagement metrics.
- Employed Material-UI for React to design a sleek, intuitive user interface, enhancing the overall user experience with a modern aesthetic.

ACHIEVEMENT AND RESPONSIBILITY

DXC Technology

- Recognized as the top performer among a team of 11, consistently exceeding quarterly targets by 20%.
- Received a client commendation and performance bonus for delivering high-quality work under tight deadlines, contributing to a 15% increase in client retention.
