About Me

My Name is Akshay Pratap Singh I have completed b.tech (cse) from Lovely Professional University Punjab with 7.11 CGPA and currently i am learning Full stack development course from prepbytes gurgaon with these technology html,css,js,react.js,node.js, and mongodb but my secilization was software testing and i have cmpleted multiple project's ,Assesement App, E-commerce App, react blog app and react blog app backaend and also done capstone project this was based on Hospital management system... i am a good cricketer and i have good leadership quality

Professional Experience

HTML CSS J.S REACT.JS NODE.JS MONGODB

E-Commerce App

- This project Add React Router page application using Browser Router and three principles of redux i.e. State, Action and Reducer.. You will also be developing Login functionality in this project, which includes the Registration Concept and Login Concept. You will be using JWT tokens to acheive this functionality.

React Blog App Backend

- This project mainly revolves around technologies like Node.JS and Express. During its development we will understand that how to create a server and then how to expose the APIs having data using express server. And also understand how to create the structure of data and maintain the data

React Blog App

- React Blog App while developing this project add, the newest concept of React16. And also you will get comfortable in developing single page application using Browser Router.
