## PROJECTS

---

### 1. Todo List (CRUD Application)

Developed a full-stack web application with React.js for the front end, and Node.js and Express for the backend, utilizing MongoDB for data storage. Built features like adding, updating, and deleting tasks with seamless data exchange through RESTful APIs. Focused on managing stateful and stateless React components and ensured optimal user interface responsiveness.

### 2. E-commerce React Project

Developed a responsive e-commerce platform using ReactJS, focusing on interactive user experiences, dynamic data rendering, and state management using Redux.

### 3. YouTube Clone (ReactJS)

Created a YouTube-like platform using ReactJS, integrating real-time search functionality and dynamic content updates with a clean and modular component-based structure.

## EXPERIENCE

---

### Frontend Development

Proficient in creating responsive user interfaces using React.js and CSS frameworks like Bootstrap and TailwindCSS. Experienced in state management with React using Redux and implementing reusable component-based architectures.

### Backend Development

Worked on building RESTful APIs with Node.js and Express.js, with a focus on seamless front-to-backend integration using MongoDB.
