

PIYUSH NEGI

7011897262 | Npiyush35@gmail.com | [Github](#) | [Website](#)

Highly motivated and detail-oriented front-end developer with years of hands-on experience creating responsive, web accessibility (ARIA) and user-friendly UI web applications. Proficient in HTML, CSS, JavaScript, and ReactJS. Skilled at collaborating with cross-functional teams to translate design patterns into functional products. Has the ability to prioritize and manage multiple tasks simultaneously in a fast-paced environment with attention to detail. Passionate about learning new technologies and staying up to date with the latest trends in web development principles and web standards, like to contribute to Open Source Software projects ([have a look here](#)).

SKILLS & TECHNOLOGIES:

Programming Languages & Front-End Frameworks: HTML, ReactJS, JavaScript (ES5, ES6, ES7), TypeScript, Angular, Next.js, jQuery, **Styling & Frameworks:** SASS/SCSS, CSS, Tailwind, Bootstrap, Bulma,

Build Tools: Webpack, Babel, Redux, NPM, Debugging & Troubleshooting: eslint, **Testing:** Jest, Selenium, Mocha **Backend:** Node.js, **Databases:** MySQL, MongoDB

API: RESTful, GraphQL, **Code versioning:** Github/Gitlab.

Work Experience:

- Previously worked as a freelance web developer (2021-2023) [\[Work Slideshow\]](#)
- Web3 Full Stack Developer - Startup (2022) [\[Prev work repo\]](#)

Played a key role in developing web3 applications using blockchain technologies and smart contracts.

Implemented front-end functionalities and integrated them with the blockchain backend.

Collaborated with the team to analytical design and build decentralized applications (DApps) with a focus on user experience and security.

PROJECTS & APPLICATIONS:

Tenzies Game ([Source code Live Demo](#)): A simple game to select all the same 6 digits and try to be the fastest than others. Built using ReactJS, local storage for the fastest time, and hosted on Firebase.

TODO APP ([Source code Live Demo](#)): A Simple Todo App that uses local storage in the browser and a very simple and elegant user interface.

React Dashboard ([Source code Live Demo](#)): A Simple Dashboard app shows analytical information about your video and channel on the YouTube Platform.

Currency Exchange ([Source Code Live Demo](#)): A simple currency exchange web application with HTML, CSS, JavaScript, and chartjs Library. The application showcase fluctuations in the currency of different countries and show exchange rate and provide visual aid with the help of a line chart. Built with the help of freeconv API.

Weather App with Open Weather API Project ([Source Code Live Demo](#)): A simple weather app with OpenWeatherMap API data on ReactJS showing details like location, the icon representing weather type, and description of the weather in any form of device desktop, mobile or tablet. Used react context, and state hooks to decrease code size.

EDUCATION:

BCA (Bachelors of Computer Application), SRI GURU TEGH BAHADUR INSTITUTE OF MANAGEMENT & INFORMATION TECHNOLOGY.

INTERNSHIP:

Allsoft Solutions and Services Pvt. Ltd - Internship: Android Application

Summary: - learn about Android application building tasked with creating a project that would be used as a final-year lab test assignment. So, to build a student management tool using Java, android Studio had to explain data flow and create admin roles for data manipulation authorization.
