

Fahad Thondiyil Thazhe

Flutter Developer

 Phone  Email  LinkedIn  GitHub  LeetCode

Profile Summary

A highly motivated and skilled self-taught Flutter Developer aiming to pursue a bright career in mobile app development using Flutter. Passionate about creating innovative and user-friendly applications using Flutter framework and Dart programming language. Proactive communicator with a collaborative approach, consistently driven to achieve better results.

Projects

Phloem – E-Learning Application | *Flutter, Firebase, GetX, Provider, RazorPay API*

[Live Link](#) | [GitHub](#)

- Comprehensive E-Learning platform with distinct user, mentor, and admin interfaces, enabling efficient course management and user engagement.
- Engineered Firebase integration for secure authentication, and data management using Firestore Database.
- Implemented robust state management using GetX and Provider, enhancing application performance and user experience.
- Integrated RazorPay API for seamless payment processing, supporting both paid and free courses.
- Enabled users to interact with mentors through a secure community chat feature using Realtime Database, fostering a collaborative learning environment.

Recipe Book – Recipe Application | *Flutter, Hive*

[Live Link](#) | [GitHub](#)

- Designed and deployed a user-centric recipe application facilitating easy recipe management and discovery.
- Leveraged Hive database for efficient storage and retrieval of recipes, ensuring fast and reliable data access.
- Implemented review feature, allowing users to write and view reviews, enhancing user interaction and engagement.
- Crafted a minimalistic and appealing UI, ensuring a smooth and intuitive user experience.

MyExpense – Personal Expense Tracker | *Flutter, Hive, Provider, Clean Architecture*

[GitHub](#)

- An Expense Tracker Application designed to help users efficiently track, manage, and categorize personal expenses monthly.
- User-friendly, responsive design with a consistent theme for a seamless user experience across devices.
- Utilized Provider for effective state management.
- Implemented local storage using Hive for data persistence.
- Applied Clean Architecture principles for enhanced code maintainability and testability.
- Integrated local notification for daily reminders to record expenses.

Mini Projects

Cart App | *Flutter, Fake Store API, Bloc*

[GitHub](#)

- Built an e-commerce application leveraging the Fake Store API for product data, simulating a real-world shopping experience.
- Employed Bloc for efficient state management, ensuring seamless user interactions and data handling.

Weather App | *Flutter, OpenWeatherMap API, Bloc*

[GitHub](#)

- Developed a weather application using Flutter and OpenWeatherMap API to fetch real-time weather data.
- Integrated location services to provide current location weather updates.
- Used Bloc for state management, ensuring smooth and efficient app performance.

Technical Skills

Programming Languages: Dart, C, Java
Framework: Flutter
State Management: Bloc, GetX, Provider
Database: Firebase, Hive, SQFlite
Tools: GitHub, Figma, VS Code
Architectures: MVC, Clean
Familiar with: Data Structures and Algorithms, Third Party Integrations, REST API

Soft Skills

Creative Thinking
Communication
Leadership
Initiative
Collaborative

Education

Brototype <i>Mobile App Development Using Flutter</i>	2023 - Present Calicut, Kerala
Farook College, University of Calicut <i>Bachelor of Vocation in Software Development (CGPA: 7.2)</i>	2020 - 23 Calicut, Kerala

Extra-Curricular Activities/Leadership Roles

SKILLA Tech Workshop <i>Student Coordinator</i>	2023
TinkerHub AI Workshop <i>Attendee</i>	2022
Inter-Scholastic Football Tournament <i>Team Member</i>	2018
