PROJECTS SUMMARY

PriyalImpex <http://priyasoftware.in/>

Technology: C#, ASP.NET MVC, .NET CORE, JavaScript, jQuery, JQ Grids, Web API, ADO.NET, Entity Framework

Backend: SQL Server Management Studio 19.

Role: Developing, Designing and Coding

Description: This project is of import/export domain. I have created various reports like sales reports, detailed reports, inventory reports, order reports, invoice reports, payment reports etc. I have also created various types of charts to show business status. Also created automated Email services to send reports via email daily.

- **Cloudfy V5** <https://devtest01.cloudfystage.com/cloudfyv5store/> & <https://devtest01.cloudfystage.com/cloudfyv5bm/login>

Technology: C#, .NET CORE, Web API, ADO.NET, Entity Framework, React, HTML, CSS, JavaScript

Backend: SQL Server Management Studio 19.

Role: Developing, Designing and Coding

Description: This project is for converting legacy project from old to new technology. In this we have replaced NET Framework 4.8 project into .NET Core 6. For UI, we used React therefore created various components for single sage application.

- **Integration Dashboard**

Technology: C#, .NET CORE, Web API, Entity Framework, React, HTML, CSS, JavaScript

Backend: SQLite.

Role: Developing, Designing and Coding

Description: This project is for importing excel or Google sheets into SQLite and seeing the data in a React application. In this, user can also write SQL commands into React UI so that he/she can see data as per his/her requirement.

- **Cloudfy V4** <https://devtest01.cloudfystage.com/v3dev/> & <https://devtest01.cloudfystage.com/v3dev/businessmanager>

Technology: C#, ASP.NET MVC, JavaScript, jQuery, JQGrids, Web API, ADO.NET, Entity Framework

Backend: SQL Server Management Studio 19.

Role: Developing, Designing and Coding

Description: This project is in the E-Commerce domain, and this is the main Cloudfy business product. I have created various functionalities like transactional documents (order pdf, invoice pdf, credit note pdf), Multilanguage functionality, Google translate, various reports in JQGrids, Page builder etc.
