I am a MERN stack developer with 3.5 years of hands-on experience in building scalable web applications using technologies like **React.js, Node.js, Express.js, Next.js**, and **Nest.js**. My expertise lies in creating full-stack solutions that are both efficient and maintainable, with a strong focus on performance and user experience.
In addition to my MERN background, I bring over **4.8 years of experience in PHP development**, primarily working with frameworks such as **CodeIgniter** and **Laravel**. This dual expertise has provided me with a strong foundation in backend logic, database design, and MVC architecture. Overall, I have **8 years of experience in the IT industry**, combining both modern JavaScript-based frameworks and traditional backend technologies. I am currently looking for a challenging and creative opportunity where I can further enhance my skills, contribute meaningfully to a team, and grow professionally within an innovative and forward-thinking organization.
