Objective

I am seeking a position as a Java developer where I can enhance my coding skills, gain hands-on experience in software development, and increase my ability for organizational goals as well as myself.

Educational Qualification

- Passed Out **MCA** from AKTU University [2023]
With 68%
- Passed Out **BCA** from VBSPU [2021]
With 70%

Technical Skill

- JAVA
- ORM (**hibernate-jpa**)
- Database
- Framework (**spring boot**)
- **Microservices**
- Web Framework (**Angular**) DevOps (**Docker, Jenkins, AWS**)

Certification

- Full Stack Java Developer ([link](#))

Experience

- During **8 months of “full stack java developer”** training program I have worked on these many projects some are given in projects section below.

Projects

- **Building Stock Market API** integration using spring boot and microservices.
Description: implemented microservices pattern with spring boot where user will input company name and share quantity and will get stock price.
- **JWT Authentication and Authorization** using Spring Boot Security latest version with Angular
Description: implemented secure api with spring security and jwt authentication and authorization with angular. Also, I have implemented email service for account activation and sending customized designed email message.
