CAREER OBJECTIVE

As a recent MCA post graduate, I bring strong technical skills in programming languages like C, Java, and C#, as well as proficiency in web technologies such as HTML, CSS, and JavaScript. With a passion for problem-solving and a commitment to continuous learning, I aim to contribute effectively to web development projects. Seeking dynamic opportunities in a challenging environment to further enhance my skills and make meaningful contributions.

ACADEMIC AND PERSONAL PROJECTS

Analysis Personal Finance using Machine Learning   Feb – June 2024
Brief Description: The objective of this research project was to evaluate the feasibility of predicting an individual's personal finances based on past results with a greater accuracy than a simple linear regression. This sort of result could, in practice, be used to help people predict their retirement date, which would in turn, help them assess if they are living within their means.
Tech stack: python , Machine learning algorithm,

Book Store website   Feb - June 2023

Brief Description: Developed a fully functional e-commerce website for selling books, showcasing proficiency in web development technologies. Implemented user-friendly features for browsing, searching.ensuring a seamless shopping experience.
Tech stack: HTML, tailwind , mongoDb , javascript ,react, node-js , Express-js
