PERSONAL PROJECTS

STUDYNOTION AN ED-TECH PLATFORM

- StudyNotion is a fully functional ed-tech platform that enables users to create, consume, and rate educational content. The platform is built using the MERN stack, which includes ReactJS, NodeJS, MongoDB, and ExpressJS.
- System Architecture--> The StudyNotion ed-tech platform consists of three main components: the front end, the back end, and the database. The platform follows a client-server architecture, with the front end serving as the client and the back end and database serving as the server.

RANDOM GIFS

- Created fully responsive random gifs project using Reactjs. In this project I have created two boxes. In the first box, generate the random image and in the second box, we can easily search which we want to get gifs.

TOP COURSE

- Created fully responsive top-course project using reactjs, which contains two features -->
- 1. You can filter the course according to your choice by simply clicking on the tag name.
- 2. You can add or remove the course from your favorites and in this project also added the toast which shows the liked successfully and liked removed.
