PROJECT WORK

TourFlix

(2024-ongoing)

- Skill used is Python and Django.
- Developed backend functionalities for managing trip data, user authentication, and booking processing.
- Designed and implemented front-end interfaces for seamless user interaction and experience

Calorie Counter

(September 2023-October 2023)

- Skill used is Python and Django.
- Implemented backend functionalities for calculating and displaying total calorie consumption based on the user's input.
- Integrated user authentication for secure registration, login, and personalized diet management

Music Player Application

(August 2022 – September 2022)

- Skill used is Python.
- Designed and implemented a user-friendly interface using Tkinter widgets for seamless navigation and control of music playback.
- Implemented playback controls (play, pause, stop, skip) adjustment features to provide users with full control over their music listening experience.
