PROFILE

Dedicated and adaptable web developer with a transformative journey in the field of web development. I began my career with a foundation in HTML, CSS, and JavaScript, honing my skills while working extensively with WordPress. Over time, I leveraged this experience to expand my knowledge into the realm of modern web technologies, including React, Node.js, Express, MongoDB, and Bootstrap.

With two years of hands-on experience in front-end development and a firm grasp of back-end technologies, I am now poised to transition into a full-stack developer role. My journey reflects a relentless commitment to continuous learning and growth.

My objective is to contribute my proficiency in both front-end and back-end development to a dynamic team, delivering innovative web solutions that push boundaries. I am passionate about crafting high-performance, user-centric websites and am excited to embrace new challenges in the ever-evolving world of web development.

EMPLOYMENT HISTORY

Front End Developer

AR Technity   23- Sep-2021 -- Currentlly Working

- Collaborated with cross-functional teams to develop and maintain responsive and visually appealing web applications.

- Translated wireframes and design mockups into fully functional and interactive web pages.

- Utilized HTML, CSS, and JavaScript to implement front-end features, ensuring compatibility across various browsers and devices.

- Developed mobile-friendly and responsive layouts using the Bootstrap framework.

- Integrated third-party APIs and libraries to enhance website functionality.

- Conducted code reviews and implemented optimization techniques for improved performance.

- Collaborated with back-end developers to integrate front-end components seamlessly.

- Troubleshot and resolved front-end issues to ensure a smooth user experience.

KEY SKILLS

- Proficient in HTML, CSS, and JavaScript, with a strong understanding of web standards and best practices.
- Experienced in using Bootstrap framework for responsive and mobile-first web development.
- Extensive knowledge of WordPress, including theme customization, plugin integration, and content management.
- Skilled in React.js, creating reusable components, state management, and working with React Router.
- Familiarity with Node.js and Express.js for server-side development and API integration.
- Proficient in working with databases, specifically MongoDB, including data modeling and CRUD operations.
- Strong problem-solving and debugging skills to identify and resolve issues efficiently.
- Ability to work collaboratively in a team environment, with excellent communication and interpersonal skills.
- Continuous learner, keeping up-to-date with the latest web technologies and industry trends.
- DOM Manipulation through JavaScript and other functionality using JavaScript,

PROJECTS

- **https://roland-auer.com/** (This is my first project in AR Technity and this website is about a jewelry portfolio in which all codes are returned custom and then push in WordPress by meta box the special feature in this website is a carousel and the carousel is completely made custom by me and the specialty is there are lots of carousel in this website and you can control them by keyboard also.)

- **http://gcmalta.com/** (This is a College website in Malta and the website is built through Elementor page builder in word press. I made the UI of the whole website and all the pages whether I take some references from other websites.)

- **https://www.maisonmartialdesprin.com/** (This website is about selling furniture and the UI is totally different and this website is in dark theme as per the client's requirement)

.
- **https://cllm.confinity-solutions.com/support/** (This is a documentation website. In this we sorted most of the pages as they are wrongly linked and added some features through the Javascript).

- h**ttps://maudedegoer.com/** (This is also an Institutional website and again the whole UI is designed by me. This website is also built in WordPress)

- **https://artechnity.com** (Currently I worked in This website and some work is left on this website but I create this UI is made by me

- These are some examples of my work, there are more projects in which I worked and I also work in a custom code project a php website but for some reason, the website is shut down due to the bank shutdown in America as the project is about credit cards and I integrate all the API as the backend developer build the API and I integrate the API, And currently I also worked in a Data sales website which is a MERN website and I use the technology which I recently learned.
