PARIMAL SRIVASTAV

React Developer

Passionate about bringing innovative web experiences to life, I am eager to contribute as a Front End Web Developer, harnessing my proficiency in React.js and front-end development. With an enthusiasm for technological advancements and a penchant for clean, accessible designs, I seek to join a progressive organization where my skills can fuel growth and success. My commitment lies in delivering user-centric solutions and pushing the boundaries of web technology to create products that stand out in the digital landscape.

PROFESSIONAL SUMMARY

- Specialized in React.js with over 2.7 years of hands-on experience in developing responsive and dynamic web applications.
- Achieved a 15% improvement in application load times through performance optimization and code refactoring.
- Managed full-stack web development projects, ensuring seamless integration with robust Nodejs backend systems.
- Developed a strategic framework for a Ride-share-matrix application, demonstrating acute problem-solving skills.
- Created custom features such as PDF reporting and multimedia management tools, enhancing user engagement.
- Skilled in a range of front-end technologies including Redux, Node.js, and responsive design.
- Adept at UI/UX design, with a track record of developing user interfaces that enhance the overall user experience

SKILLS

Technical Skills: React.js, Front-End Integration, UI/UX Design, Backend API Development, Redux, Node.js, Responsive Design, JavaScript
Soft Skills: Teamwork, Leadership, Problem-solving, Communication

WORK EXPERIENCE

React Developer   (Dec 2024 - Present)
Marketwick Pvt Ltd (Noida Uttar Pradesh)

React Developer   (Jun 2024 - Nov 2024)
Pay Panda Payment Solution (Noida)

React Developer   (Apr 2022 - Jun 2024)
Tech Aura Private Limited (Noida)

EDUCATION

B.Tech   (Aug 2017 - Aug 2021)
Rajkiya Engineering College

ACHIEVEMENTS

- Successfully led the development of Ayanstech Dialer, integrating multiple forms, CSV file uploads, and data-based lead communication, resulting in streamlined client interactions.
- Pioneered the creation of a custom calendar feature for the Dj People project, significantly improving the efficiency of client data management and display.

PROJECTS

PAY Panda All payment solution
URL: https://retailer.paypanda.in/

Technologies: React.js, AES 256 Encryption, RSA 256, Node.js, Ant Design, Redux, Payment APIs

Key Contributions:

- Developed the entire frontend from scratch using React.js.
- Implemented a secure login/signup authentication system using AES 256 encryption for passwords.
- Integrated DMT payment through four banks and AEPS payment services.
- Designed a role-based dashboard with different interfaces for Retailer, Distributor, and Super Distributor roles.
- Implemented session-based security (automatic screen locking after 2 minutes of inactivity).
- Integrated secure payment methods for utility bills, mobile, and DTH recharges.

- Developed the onboarding module, including user video recording for authentication.
- Created an export-to-excel feature for user reports and transaction histories.
- Reused code to optimize the project for different payment services.

Pay Panda Admin Portal
URL: https://admin.paypanda.in/
Technologies: React.js, Node.js, Redux, Ant Design, APIs

Key Contributions:

- Developed a role-based admin portal for managing retailers, distributors, and super distributors.
- Created a module for managing service access based on users' locations and types.
- Developed a dashboard for managing banks' availability for AEPS, DMT, and payout transactions.
- Implemented a feature to display user activities and assign tasks to Area Managers and Zonal Managers based on their roles.
- Worked extensively on admin-side APIs for approving or rejecting user-submitted documents.

Ayanstech Dialer
Technologies: React.js, CSV Upload, Node.js, Material ui
Key Contributions:
- Created multiple forms for adding, editing, and deleting scripts, leads, SMS, and templates.
- Implemented CSV file upload functionality, allowing seamless integration of leads into the database.
- Developed a role-based login function, allowing users to access features based on their roles.
- Integrated features to send data-based leads, ensuring efficient client communication.

Ride-share Matrix
URL: https://ridesharematrix.com/
Technologies: Laravel, JavaScript, AJAX, Bootstrap
Key Contributions:

- Developed CRM panels for managing driver details, trip data, charges, and other information.
- Worked on frontend integration with a Laravel backend.
- Created data tables and interfaces for showing trip information.

Averti System
URL: https://life.avertisystems.com
Technologies: React.js, Node.js, Google Calendar API, PDF generation APIs, Material ui
Key Contributions
- Developed a custom dashboard with responsive design.
- Built a report section, converting HTML to downloadable PDF formats.
- Integrated features for recording and uploading audio, video, and text messages, which were sent to users via email.
- Created APIs in Node.js to handle multimedia formats such as PDF, audio, and video.
- Developed a task management module where tasks could be assigned based on user roles, with priority and deadlines.
- Integrated and synchronized a custom calendar system with Google Calendar to show and manage tasks.

Client Averti System
URL: https://client.avertisystems.com/
Technologies: React.js, Node.js, Google Calendar API, JWT Authentication, PDF generation APIs

Key Contributions:

- Developed a client authentication system using JWT, allowing secure login and access based on client roles.
- Synchronized calendar tasks with Google Calendar, integrating Averti's custom calendar system to manage client appointments, tasks, and deadlines efficiently.
- Built a dashboard for clients to view and manage financial records, health checkups, and other important client data in real-time.
- Created modules for managing and storing financial records, tracking transactions, and generating PDF reports for clients.
- Integrated features for health checkup tracking, allowing clients to upload and access their medical history, and scheduled appointments.
- Worked on LifeNavigator, a client-facing module that helps users navigate through their financial, health, and other personal data.
- Developed multimedia handling features, enabling clients to record and upload audio and video messages that could be saved as downloadable files or emailed.
- Implemented a robust task management system, allowing clients to track and prioritize tasks assigned by their managers, with reminders and priority adjustments based on deadlines.

API Selling Portal for Pay Panda
Technologies: React.js, TypeScript, Node.js, JWT Authentication, Ant Design,Material ui
Key Contributions:
- Developed the API selling portal from scratch using React.js and TypeScript.
- Implemented user authentication and login using JWT to securely manage access to the portal.
- Built a comprehensive user onboarding system, collecting and verifying data such as Aadhar, PAN, and other necessary documents.
- Designed and developed a nested tab structure for managing the various APIs sold on the platform, ensuring a smooth user experience based on different API categories.

- Worked closely on the backend integration to handle document submissions and verification processes, ensuring secure and accurate handling of sensitive data.
