PROJECTS

APP CODEX

- A mobile application that can help you nurture deeper relationships with these mobile-first users and increase product or service sales
- A mobile app also offers more cross-channel marketing opportunities, which means shoppers can move from a social media ad to your app to make a purchase seamlessly
- Through design and the right communication strategy, a mobile app serves as an always-on brand ambassador.

FOODPE

- A restaurant and cafe billing app to automate all your bills receipt, and table management waiter, order -taking features, etc , and reports you on all total sales and profits in real-time
- Web App for online food order, Admin Portal for food chains & domains
- Features: Track remaining and expired inventory stocks, sale counter screen, add items to the cart, customer management, restaurant management, billing system,

HOSPITAL MANAGEMENT

- The Application is having mainly two modules. One is at Administration Level and other one is of user i.e. of patients and doctors.
- Maintains authentication in order to access the application. Administrator task includes managing doctors information, patient's information.
- To achieve this aim a database was designed one for the patient and other for the doctors which the admin can access. The complaints which are given by user will be referred by authorities.
- this software has the facility to give a unique id for every patient and stores the details of every patient and the staff automatically.
