BACK END DEVELOPER

PROFESSION EXPERIENCE

- Total Experience: 1.2 years
- Company: Okaya Infocom Pvt Ltd
- Designation: Java Developer

TOOLS EXPERIENCED WITH

- STS
- MySql Workbench
- Postman
- Eclipse

TECNICAL SKILLS

- Technically advance Java developer with experience in designing and developing Java / J2EE web based application, Offering strong expertise in Spring Boot, Hibernate JPA and Web Services.
- Developed highly interactive user interface using JSP and JSTL tags.
- Experience in Installing MySQl database and creating Database schema.
- Experience in developing the entire application using MVC Architecture integrating Hibernate JPA with Spring Boot Framework. .
- Experience in creating controllers in spring boot project.
- Experience in creating repositories in Spring boot project.
- Experience in developing entity class with encapsulation concept.
- Experience in developing Restful Web Services using Spring Boot.
- Experience in connectivity of Database using JDBC.
- Experience in developing Restful Web Services & performed testing using Postman .
- Experience in configuring Tomcat in STS.
- Experience in developing View layer, Controller layer, Services layer, Repository layer.
- Well known about SPRING BOOT Annotations and JPA Annotations.
- Knowledge on SQL.
- Having knowledge on Core Java topic of Collections.
- Knowledge on Object-Oriented programming Concepts.
- Knowledge on Maven.
- Excellent knowledge of creating Servlets.
- Experience in adding Jars in Dependency tags of POM.XML file to use Email API , MySQL Database, Tomcat Server.

PROJECT : APENT 6.9

TECHNOLOGY

- Core Java
- Spring Boot
- Hibernate JPA
- MySql
- Postman
- Eclipse
- MySql Workbench
- STS
- Collections
- Tomcat
- JSTL

DESCRIPTION

APENT software is a tool that's designed to help your organization , offer your customers a unique and seamless experience, as well as build better relationships by providing a complete picture of all customer interactions, keeping track of your sales, organizing and prioritizing your pportunities, and facilitating collaboration between various teams.

ROLES AND REPONSIBILITIES

- Create database schema.
- Configure application.properties file .
- Using maven adding project dependencies.
- Implementing MVC architecture while developing the code.
- Developing entity class using encapsulation concept
- Developing controllers in Spring boot to interact with view and backend business logic.
- Creating repository layer to perform CRUD operation.
- Developing frontend using JSP and HTML.
- Using micro services approach to build the application.
- Fixing defects communicated by Tester .
- Testing web services using postman.
- Integrating Email API in the project.
- Developing email sending services .
- Using JSTL tags in the project.
- Attending Daily Meetings .
