- Mentored junior developers, offering guidance on best practices and conducting code reviews to maintain high development standards.
- Participated in the full software development lifecycle, from requirements to deployment.

## PROJECTS EXECUTED

**Client:** TradersCabinet

**URL:** [TradersCabinet](#)

**Details:** The TradersCabinet project is a fintech platform that manages transaction money for trading. The project utilized ASP.NET, Angular 15, and Node.js technologies. It features a fully automated user KYC process, eliminating manual procedures. Led a team of four members, including a backend developer, frontend developer, designer, and tester. As team lead, responsibilities included creating the project structure, handling authentication and authorization, implementing payment gateway functionalities, managing interceptors, performing code reviews and merges, assigning tasks to team members, and reporting progress to the manager.

**Client:** SibaWallet

**URL:** [SibaWallet](#)

**Details:** The SibaWallet project is a digital wallet platform designed for managing money transactions and currency exchanges. It utilized ASP.NET, Angular 15, and Node.js technologies. Similar to the TradersCabinet project, it incorporated an automated online KYC process. Worked with a team of four (backend developer, frontend developer, designer, and tester). As the team lead, my role involved creating the project structure, handling authentication and authorization, implementing all payment gateway functionalities, managing interceptors, conducting code reviews and merges, assigning tasks, and providing reports to the manager.

**Client:** ABForm E-Commerce Dashboard

**URL:** [ABForm Workwear](#)

**Details:** As a Senior Frontend Developer, I independently worked on an e-commerce application using Angular 15 for the frontend, and Java for the backend. The project involved designing and implementing the user interface for the dashboard, ensuring seamless integration with the backend.

**Client:** Lapco Admin Panel

**URL:** [Lapco Admin Panel](#)

**Details:** As a Senior Frontend Developer, I worked solo on the development of the e-commerce admin panel using Angular 13, HTML, CSS, and JavaScript for the frontend. The backend was developed using Java, and I was responsible for creating and managing the user interface and integrating it with the backend functionalities.

**Client:** Mirrorsize Admin Panel

**URL:** [Mirrorsize Admin Panel](#)

**Details:** As a Senior Frontend Developer, I independently developed the admin panel for the Mirrorsize platform using Angular 15, HTML, CSS, and JavaScript. The backend was built with Java, and my role included ensuring seamless integration and user experience for the admin interface.
