Aug'22 - Oct'22

Projects

Crowdfunding App (Major Project)

April'23

A Web app built on the blockchain using **Solidity** and **Reactjs**.

- The application is a mockup of Kickstarter which is used to fund ideas with the help of Blockchain and **Smart-Contracts**.
- This can be achieved by making funding and ideas histories more transparent and secure with blockchain.

Product Management System

Jan'23

A system for managing databases using **Postman** using **Node/Express** and **MongoDB Atlas**.

- The system allows **CRUD** operations for Product Name, Quantity, Price, and Image.
- It allows Creating, updating, finding, and deleting various products.

Newsletter-signup App

Jan'23

A website using **Html**, **CSS**, **JavaScript**, **Nodejs**, and **APIs** to subscribe to newsletters.

- Implemented **API** integration using newsletter service providers such as Mail Chimp.
- All the essential features like managing data, authentication, and an interactive UI is considered.

Academic and Extracurricular Achievements

- Contributed to various open-source GitHub repositories during **Hacktoberfest** Hackathon 2022.
- Part of **MLH** fellowship hackathon (social good week) and contributed to projects.
- Top 10** in 100 teams in the **Dexterix2.0** hackathon conducted by Galgotias University.
