PROFESSIONAL EXPERIENCE

Metaversity Technologies

Sep 2022 - Present

Full stack developer

Accomplishments

- Engineered a decoupled application architecture, providing flexibility and ease of integration across various components of our project.
- Ensured modular design, allowing for efficient updates and enhancements without disrupting the entire system.
- Developed a versatile decoupled application capable of integrating seamlessly across different modules within our ecosystem.
- Developed, and Produced high quality code for Latest functionalities, and updates in websites.

Bonami Software

June 2021 - Sep 2022

Web Developer & Designer

Accomplishments:

- Responsible for the strategic oversight and continuous maintenance of essential web services and websites.
- Engaged in close collaboration with senior developers to drive website updates and spearhead the creation of innovative features. Leveraging collective expertise to implement cutting-edge solutions, enhance user experiences
- Developed, Redesign Static, Dynamic, E-commerce websites from Scratch

Freelancing

Jul 2021 - Sep 2022

Junior Full stack developer

Accomplishments:

- Web App development, Web, and Graphic designing.
- Web App development, Web, and Graphic designing.
- Ensure applications security and ability to interact with multiple APIs and databases

PROJECTS

Mv games

<http://15.207.226.246:8001/>

Technology ReactJs, Node Js, Express Js, Redis, Mongodb, AWS, Socket Io, CICD

Features

- **Web3/Web2 Integration:** Drove the conception and development of a groundbreaking gaming platform that seamlessly integrates Web3 and Web2 technologies. Pioneered a unique environment where users can engage in captivating games and place bets using both cryptocurrency and fiat currency,
- **Global Connectivity:** Developed and integrated a Live Chat Global feature, enabling users worldwide to engage in real-time conversations. This feature enhances the social aspect of the gaming platform, creating a vibrant and connected community.
- **Privacy-Focused Private Chat:** Designed and implemented a Private Chat feature, allowing users to engage in private conversations within the platform securely. This enhances user privacy and provides a personalized communication channel.
- **Exclusive Rewards:** Designed a rewarding system where both the referring user and the new participant receive exclusive incentives. This creates a win-win scenario, encouraging active participation and engagement within the gaming community.

Maggibook

<https://maggibook.com/>

Technology React Js, Type Script, Styled Components

Features

- **Local Currency Integration:** Seamlessly integrated the Indian Rupee (INR) into our platform, allowing users to place bets with ease in their native currency.
- **Real-Time Conversion:** Implemented real-time currency conversion features, allowing users to view and place bets in INR without the hassle of manual conversions.
- **User-Friendly Interface:** Designed with a user-centric approach, the chat feature boasts an intuitive interface for seamless navigation. Accessible and easy to use, it enhances the overall user experience.
- **Diverse Game Selection:** Access a wide variety of games from third-party developers, expanding the gaming catalog to encompass genres, styles, and themes that appeal to a diverse audience.

Lottery App (decouple application)

<http://15.207.226.246:2002/?clientId=c3941590-54a0-4063-b349-ed67be77246c&userId=123>

Technology Next Js, Type Script, Nest Js, Mongodb, AWS

Features

- **Intuitive Ticket Purchase:** Implemented a user-friendly interface for purchasing lottery tickets, ensuring a seamless and enjoyable experience for users of all levels of technical proficiency.
- **Winning Prizes:** Enriched the user experience by incorporating a dynamic prize system. Users who win the lottery are rewarded with exciting prizes, creating a sense of anticipation and delight.
- **Microservices for Results:** Utilized microservices architecture for real-time lottery results, enhancing responsiveness and providing users with immediate updates on draws and outcomes.

P2P Crypto Sale

<http://15.207.226.246:8011/>

Technology React Js, Type Script ,Node Js, Express, MongoDB, Socket.io, Styled-Components

Features

- **User Registration:** Users sign up on the P2P platform, providing necessary information and undergoing any required identity verification processes.
- **Listing and Matching:** Sellers create listings indicating the amount of cryptocurrency they want to sell, the price, and the accepted payment methods. Buyers browse these listings and choose a suitable offer.
- **Payment:** The buyer then makes the payment to the seller using the agreed-upon fiat currency or cryptocurrency. Common payment methods include bank transfers, online payment systems, or in-person cash transactions.
- **Activities:** Implemented real-time features using socket.io for chats and instant updates on trade/order activities.
- **Admin:** Built admin dashboard with functionalities like dispute resolution between parties & Role Based Access Control.

Apna Kisan

https://play.google.com/store/apps/details?id=com.blackhatcode.in.ssa_app

Technology

React Native, React Js, Node Js, Express Js, MongoDB, Digital ocean

Features

- **User Authentication:** Allow users to create accounts or log in using existing credentials. Implement secure authentication methods to protect user data.
- **Product Catalog:** Display a well-organized product catalog with categories and filters. Include high-quality images, product descriptions, and pricing information.
- **Integration with WhatsApp API:** Once admin uploads product in a specific product category, product notification will send to all our users via WhatsApp.
- **Wishlist and Favorites:** Allow users to save products to a wishlist for future consideration.
- **Promotions and Bonus Points:** Run special promotions offering bonus points for specific actions, such as making a purchase during a certain timeframe.
