Relevant Experience

Software Engineer **Clicbrics** Sept 2021 — Present

- Developed a robust real estate website using Next.js ensuring seamless user experience and optimal performance.
- Integrated Google Maps API for displaying interactive property maps and providing location-based search functionality.
- Implemented Progressive Web App (PWA) features, enabling users to install the website as a standalone application on their devices.
- Utilized Material-UI (MUI) library for designing consistent and visually appealing user interfaces, maintaining brand identity throughout the website.
- Implemented web push notifications (FCM) to engage users with timely updates, such as new property listings and personalized offers.
- Integrated Highcharts library for generating interactive and visually appealing data visualizations, presenting property market trends and statistics.

Certifications

- MongoDB Node.js Developer Path | MongoDB University | 2023
- Introduction to Front-End Development | Meta | 2022
- Introduction to Cybersecurity Tools & Cyber Attacks | IBM | 2022

Accomplishments

- Awarded as the Best Team Player for exceptional collaboration and contributions to team projects.
- Secured 2nd Prize in a National Science Fair for innovative research and project development.
- Served as a Core Member in organizing and managing successful college fests, contributing to their overall success.

Skills

Programming Languages

Javascript , HTML , CSS , SCSS
Typescript

Libraries & Frameworks

React, Next.js, React Native,
Node JS, Express Js

Tools & Platforms

Git, GitHub, Netlify, Vercel,
Mongo DB, Heroku,
WordPress, Firebase, Figma

Projects

Starbucks Clone

Starbucks clone using next js
and tailwind

Airbnb Clone

Airbnb clone using next js
and tailwind with SSR

rishabhsharma.vercel.app

Built using next js and scss
and with smooth scrolling
and magic cursor

Education

Chitkara University

Bachelor of Engineering in
Computer Science

Interests

Coding , Travelling , science
fiction movies , Exploring
