Apr 2022 - Oct 2022

- Built and optimized responsive websites using HTML, CSS, and Bootstrap, improving load time by 30%.
- Developed interactive UIs and components with React.js, ensuring modularity and scalability. Implemented dynamic features by integrating third-party APIs and ensuring real-time data flow.

- Collaborated with back-end developers to streamline data handling and ensure smooth functionality.Enhanced cross-browser compatibility and fixed UI bugs for consistent performance across all platforms.

## PROJECTS

---

- **Procure Right Website** - Procure Right is a dynamic e-commerce platform designed to streamline the purchasing process for businesses and individuals. The website provides an intuitive interface for users to browse and purchase a variety of products, with a focus on responsive design, seamless user experience, and high-performance functionality.
- **Kaizen Prefab Website** - Developed a responsive website for a steel construction company to showcase services and completed projects.Created a construction project tracker web app to monitor progress, materials, and team updates in real-time.Implemented a mobile-friendly gallery module to display high-resolution images of structural and fabrication projects.
- **Weather App** - The Weather App is a user-friendly application that allows users to check real-time weather conditions for any location. Using a modern tech stack, the app provides an intuitive, interactive experience with live data updates and a responsive interface. The app fetches weather data from a weather API, displaying current conditions, forecasts, and other relevant weather details.

## EDUCATION

---

**MRK Institute of Engineering and Technology**  
Bachelor of Computer Application

**Rewari Haryana**  
Jul 2014 - Jun 2018

**Jain Sr. Sec. School**  
Computer Science

**Rewari Haryana**  
Apr 2011- May 2013

## ACHIEVEMENTS

---

- **Improved Website Performance:** Optimized front-end code and assets, reducing page load time by 40%, which significantly enhanced user experience and SEO rankings.
- **Boosted User Engagement:** Redesigned UI/UX for a key product feature using React.js resulting in a 25% increase in user interaction and time spent on the page.
- **Responsive Design Implementation:** Transformed legacy websites into mobile-first responsive designs using Bootstrap and CSS Grid/Flexbox, leading to a 30% increase in mobile traffic retention.
- **Core Web Vitals Optimization:** Identified and resolved front-end performance issues, helping the website pass all Core Web Vitals on mobile, improving Google search visibility and user experience.
