Objective

Dynamic Angular developer with 2 years of hands-on experience in building scalable and responsive web applications. Passionate about staying at the forefront of technology trends and continuously refining my skills. Seeking a role that offers opportunities for professional growth, mentorship, and the chance to make a meaningful impact through innovative software solutions.

Skills

- Programming Languages: Angular 2+, HTML5, CSS3, TypeScript, C#, Entity Framework, ADO.NET, API
- Database: MSSQL
- Tools & Platform: Git, GitHub, VsCode, Visual Studio, Notepad++
- Testing & Debugging: Playwright
- Soft Skills: Problem Solving, Leadership, TeamWork, Time Management, Communication Adaptable

Education

- **JP Institute of Engineering & Technology, Meerut** 2023
B.Tech

Experience

- **Skillikz Technologies Pvt Ltd** April 2022 - Present
Angular Developer
 - Developed responsive and visually appealing user interfaces using Angular framework, ensuring seamless user experiences across desktop and mobile devices.
 - Integrated RESTful APIs into Angular applications using Angular HTTP client for efficient data retrieval and manipulation, facilitating dynamic content updates and real-time interactions.
 - Implemented client-side routing in Angular applications to enable navigation between different views and components, optimizing user flow and enhancing application usability.
 - Created custom Angular components and directives to encapsulate reusable UI elements and enhance code reusability and maintainability across projects.
 - Implemented form validation and error handling in Angular reactive forms, ensuring data integrity and providing users with meaningful feedback for input validation errors.
 - Contributed to open source Angular projects, collaborating with the community to enhance framework features, fix bugs, and improve overall developer experience

Projects

- **THE CAR LOAN CENTRE**
Company Name: Skillikz Technologies Pvt. Ltd
Project Role: Angular Developer
Project Duration: May 2023 – Present

Description: The Car Loan Center website serves as a comprehensive online platform designed to streamline the process of securing auto financing for prospective car buyers. With a user-friendly interface and robust functionality, our website offers a convenient and efficient solution for individuals seeking competitive loan options tailored to their needs.

Roles & Responsibilities:

- Develop reusable Angular components, directives, and services to support modular and scalable application architecture, adhering to best practices and coding standards.
- Integrate Angular applications with RESTful APIs to fetch and manipulate data from server-side endpoints,

implementing efficient data fetching and updating mechanisms.

- Used Routing, Primeng and clarity grid to display the information history.
- Developed reactive form controls in angular and included two-way binding. Included responsive design and model driven approach.
- Collaborate with UX/UI designers to implement responsive and user-friendly interfaces.

- **STONECREEK**

Company Name : Skillikz Technologies Pvt. Ltd

Project Duration : May 2022 – April 2023

Project Role : Angular Developer

Description: The Stonecreek application is a bank loan application in this a user can easily take the loan online with very few easy steps.

Roles & Responsibilities:

- Developed front-end components and user interfaces using Angular framework, ensuring responsiveness and compatibility across various devices and browsers.
- Collaborated closely with backend developers to integrate the Angular application with RESTful APIs, facilitating seamless communication between the client-side and server-side components.
- Contributed to code reviews and provided feedback on architecture, performance optimization, and adherence to coding standards.
- Participate in code reviews, providing feedback on code quality, architecture, and best practices. Collaborate with other team members, including designers, backend developers, and QA engineers, to deliver high-quality solutions.
- Received daily tickets and complete the task within the time.

- **Weather APP**

Description: In weather app project, users can enter any city name to get the same day weather and 5-day weather forecast or simply click on the "Use Current Location" button to get their current location's weather details, including temperature, wind speed, humidity, and more.
