Projects

ICMR - Inventory Management System
Technologies Used   *ReactJS, NodeJS, MongoDB, ANTD*

- This application handles covid test kit inventory management. Covid test kit requests are made by labs, approved by authorised users, and then supplied by depots. keeping track of the overall number of requests, the available stock, stock transactions, and stock adjustments. Counting the number of tests that are run every day.

ERP Solution for Images Diagnostic Center
Technologies Used   *ReactJS, NodeJS, MongoDB, ANTD*

- This application is a diagnostic center management system (Images Diagnostic Center in Kuwait). It includes hospital information system (HIS), accounts management system, inventory management system and HR management system

Learn Nata
Technologies Used   *ReactJS, CodeIgniter, MySQL, Bootstrap*

- This application is an online learning system. Here, users can sign up for a variety of courses and programmes and watch video, text, and image libraries. Users may take tests.

LMS for Sharda University
Technologies Used   *ReactJS, NodeJS, MySQL, Bootstrap*

- For Sharda University, this application serves as the lead management system. Every lead is tracked from a variety of sources, including advertisements, references, the contact us page, emails, phone inquiries, etc. Every follow-up from leads is stored, and can be given to different users. Follow-up is necessary until the lead is closed or turned into an admission.

Carenzy

Technologies Used *ReactJS, NodeJS, MongoDB, Socket.IO, Redis, ANTD, Android, Swift*

- An application revolutionizing the second-hand car market. It goes beyond a traditional dealership, serving as a trusted partner for dealers in their quest for pre-owned vehicles. This cutting-edge application not only facilitates seamless bidding for second-hand cars but also provides comprehensive details on new car options. Committed to enhancing the car-buying experience, Carezny is a testament to my dedication to creating user-friendly solutions in the automotive industry.

Amour Trends

Technologies Used *ReactJS, NextJS, NodeJS, MongoDB, ANTD*

- Amour Trends(e-commerce web application) revolutionizes the world of Women's Innerwear, setting a new standard through innovative garment design and the use of premium fabrics. This is currently entering its final development phase. Built with Next.js and Tailwind CSS, the front end of the application delivers a seamless and responsive user experience. The dynamic and interactive features are powered by Node.js, ensuring robust functionality.

Jai Jinshashan

Technologies Used *ReactJS, NodeJS, MongoDB, ANTD, Android, Swift*

- This programme offers details on all Jain Temples located in India. Here, users can store the dates and images of their travels. It includes a different portal where you can listen to songs of devotion. Additionally, it has a very little e-commerce section for puja products.

Cakingom

Technologies Used *ReactJS, NodeJS, MongoDB, ANTD, Android, Swift*

- Cakingom, an e-commerce bakery app, delights users with a responsive Next.js web interface and seamless Redux state management. Its robust backend, powered by Node.js and MongoDB, ensures scalability. With native Swift and Android apps, BakeHub offers a diverse range of bakery products, delivering sweetness to your doorstep.

Arramton Employees

Technologies Used *ReactJS, NodeJS, MongoDB, ANTD*

- This application effortlessly tracks employee attendance, automates precise salary generation with tax calculations, and efficiently manages the company calendar. With a user-friendly interface, it ensures easy navigation for both employers and employees.

Ninjacare

Technologies Used *ReactJS, NodeJS, MongoDB, ANTD, Android, Swift*

- This application is a service delivery platform where people may book home-related services. It contains two applications: one for workers and another for users. Users can submit home-related tasks for workers to accept.

Sales ERP

Technologies Used *ReactJS, NodeJS, MongoDB, ANTD*

- This application helps to manage sales and purchase of a cafe. It allows users to order food and beverages online from their seats. It also keeps track of purchases and calculates profitability and provides reports depending on sales and purchases.
