## WORK EXPERIENCE - 5 Years

---

### Front End Developer

Jun 2022 – Present

Grapes Digital Agency, New Delhi

- Created responsive, visually appealing, and user-friendly interfaces using, Next.js, and advanced styling techniques like CSS Modules, SCSS, Tailwind CSS, and Styled-components.
- Developed reusable components and integrated RESTful APIs using tools like Axios, Fetch API, or React Query. Manage routing with Next.js' built-in routing.
- Worked closely with UX/UI designers to implement functional designs, collaborate with backend developers on API requirements, and communicate effectively with product managers and stakeholders to align on requirements.
- Utilized Git for version control and collaborated via platforms like GitHub or GitLab.

### Front End Developer

Dec 2020 – Jun 2022

Codenia Technologies LLP, Noida

- Designing personalized websites for fresher, middle, and senior-level clients.
- Modifying and making changes according to client's requirements.
- Checking for errors and debugging websites.
- Convert Figma to HTML.
- Maintaining Excel sheets and regularly updating data.
- Making the website responsive.

### Website Designer

Oct 2019 – Oct 2020

AsiaTech Hospitality Solution Pvt. Ltd, Noida

- Ensured responsive layouts using media queries and flexible grids.
- Converted Figma designs to HTML, maintaining design integrity.
- Ensured cross-browser compatibility for consistent visual appearance.

## RECENT PROJECTS

---

### Eicher Truck & Buses

[View project](#)

- Implemented reusable and responsive components with NEXT, ensuring cross-browser compatibility and mobile-first design principles.
- Integrated RESTful APIs for easy data fetching and management with the Fetch API method.

- Improved performance using Next.js image optimization, code splitting, and lazy loading.
- SEO-optimized web applications using Next.js with features like server-side rendering (SSR) and static site generation (SSG), enhancing page load speed and user engagement.

## Microtek

[View project](#)

- Implemented reusable and responsive components with NEXT, ensuring cross-browser compatibility and mobile-first design principles.
- Integrated RESTful APIs for easy data fetching and management with the Fetch API method.
- Optimized application performance by leveraging Next.js's image optimization, code-splitting, and lazy loading.
- SEO-optimized web applications using Next.js with features like server-side rendering (SSR) and static site generation (SSG), enhancing page load speed and user engagement.

## Lava Mobiles

[View project](#)

- Replaced traditional CSS with Tailwind for faster and more maintainable styling.
- Collaborated with designers to ensure accurate and consistent designs.
- Integrated APIs to fetch and display dynamic content in real time.
- Built reusable components using Tailwind to improve development efficiency.
- Ensured responsive layouts that work seamlessly across all devices.
- Optimized code to improve performance and reduce unnecessary styles.
- Developed interactive features that enhance user experience.
- Streamlined the design implementation process, reducing development time.

## Manforce Condom

[View project](#)

- Improved animation performance by transitioning from jQuery to CSS and GSAP.
- Worked with designers to create precise, interactive animations.
- Implemented scroll-triggered effects using jQuery and Intersection Observer.
- Utilized AOS for easy integration of complex animations.
- Built responsive layouts with semantic HTML and modern CSS techniques.
- Optimized CSS with reusable classes and media queries for consistency across devices.
