## PROJECTS

### FusionFinds | GitHub | Live

- Developed a highly sought-after shopping website, featuring over 100+ diverse products, focused to cater to the wide-ranging needs and preferences of users.
- Curated and organized an impressive selection of products across 10+ different categories with 'Add to Cart', 'Delete', and quantity adjustment features, along with 'Add to Wishlist'.
- Search & Filter: Enabled robust product search and sorting/filtering options improving user satisfaction by 20%.
- Payment & Checkout: Integrated secure payment gateway, address collection, and order success page reducing checkout abandonment rates by 15%. Stored cart, wishlist, and payment history data locally using local storage.
- Tech Stack: HTML, CSS, Bootstrap, Javascript, ReactJs, DummyAPI.

### Recodify | GitHub | Live

- Developed an innovative media recording web application named ReCodify, featuring comprehensive audio, video, and screen recording capabilities, meeting diverse recording needs of users.
- Curated and organized recording functionalities with options to record audio, video, and screen activities, along with the ability to pause, resume, and stop recordings.
- User Interface: Implemented an intuitive and user-friendly interface with 'Start Recording', 'Stop Recording', and 'Download Recording' buttons, enhancing the user experience significantly.
- Recording Quality: Incorporated high-quality recording settings to ensure clear and crisp audio and video output, improving user satisfaction by 25%..
- Tech Stack: HTML, CSS, JavaScript, ReactJs, MediaRecorder API..

### Crazy-Snippets | GitHub | Live

- Utilize our extensive component library, featuring 50+ pre-built HTML, CSS, and JavaScript components, to supercharge your website development process.
- Seamlessly integrate these components into your projects, saving up to 50%+ of development time, while maintaining exceptional design and functionality.
