PROFESSIONAL EXPERIENCE

Software Engineer Intern

Relinns Technologies Intern (Front-End Developer)   (*January 2024 – July 2024*)

- o **Project: RTime**
  - o **Description**: Contributed to the development and maintenance of the admin panel for RTime, a project management tool designed to help administrators add projects, manage timesheets, and set deadlines.
  - o **Contributions**:
    - Designed and implemented user-friendly interfaces using Angular, significantly enhancing user experience and operational efficiency.
    - Integrated RESTful APIs for reliable frontend-backend communication and data management.
  - o **Learnings**:
    - Acquired a comprehensive understanding of project management workflows and administrative tools.
    - Improved problem-solving skills through regular debugging and optimization tasks.
  - o **Technologies Used**: Angular, JavaScript, TypeScript, HTML, SCSS, Bootstrap.
- o **Project: Bot penguin**
  - o **Description**: Worked on Bot penguin, a chatbot maker application, focusing on the frontend aspects of a web scraping task in collaboration with the AI team.
  - o **Contributions**:
    - Optimized frontend components for web scraping, enhancing data extraction capabilities.
    - Integrated machine learning algorithms with AI team for efficient data processing.
    - Actively participated in team meetings to discuss progress and troubleshoot issues, fostering collaboration and innovation.
  - o **Learnings**:
    - Learned web scraping techniques and their implementation in frontend development.
    - Gained experience in integrating AI and machine learning components into web applications.
    - Improved collaboration and communication skills by working closely with cross-functional teams.
  - o **Technologies Used**: Angular, JavaScript, TypeScript, HTML, SCSS, Bootstrap.

PERSONAL PROJECTS

- o **Project: Shopify Project**
  - o **Description**: Developed a responsive web application using Angular, HTML, CSS, and Bootstrap, enabling users to sign up, browse products, and manage their shopping cart.
  - o **User Signup**: Secured signup with Angular, storing credentials in local storage.
  - o **Product Browsing**: Created user-friendly catalog with HTML, CSS, Bootstrap integration.
  - o **Cart Management**: Used Bootstrap for responsive shopping cart with product adding and checkout.
