FULL STACK MERN DEVELOPER

As a software engineer, I am passionate about creating efficient and innovative solutions to complex problems. With a solid foundation in computer science and a keen eye for detail, I strive to deliver high quality code that meets user requirements and exceeds expectations.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, Redux, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3
- **Backend:** Node.js, Express.js, Sequelize (ORM)
- **Databases:** MongoDB, MySQL
- **Version Control:** Git, Bitbucket
- **Additional Skills:** RESTful APIs, Web Security, API Integration, Responsive Design, Cross-Browser Compatibility, SEO Principles

EDUCATION

Technocrats Institute Of Technology
and Science, Bhopal

Bachelor Of Technology in Computer Science
2020 - 2024

Bonnie Foi Co-ed School, Bhopal, M.P.

Higher Secondary School
2020

Shanti Dham Sr. Sec School, Atarra, U.P.

High School
2018

PROFESSIONAL EXPERIENCE

Front End Developer

Subhx Info Tech | January 2024 - Present

- Developed and maintained React.js and Next.js frontend components for multiple projects.
- Worked closely with designers, backend developers, and project managers to deliver timely solutions.
- Implemented responsive designs and optimized performance for web platforms.
- Participated in code reviews, providing feedback to uphold code quality.
- Contributed to architectural decisions and technical discussions to improve workflows.
- Stayed updated on frontend technologies, integrating enhancements to boost user experience.

Free Lancing

2021 - 2023 December

- Proficient in HTML5, CSS3, JavaScript (ES6+), and responsive design techniques.
- Experience with front-end frameworks/libraries such as React.js and Next.js.
- Skilled in backend development using Node.js with expertise in MongoDB, MySQL, Mongoose, and Sequelize.
- Understanding of web security best practices and performance optimization techniques.

PROJECTS

Crypto Trading Exchange (Coinspe.com)

- Developed with Next.js, Redux, and Tailwind CSS, featuring real-time market data, user authentication, trading interface, wallet management, and security measures.
- Project Demo: <https://coinspe.com/>

Movie Rating App

- The Movie Rating App is a web application designed to help users discover, explore, and rate movies.
- This project is made use of React js , Redux tool kit for state management , axios for get web API data , etc.
- Users can search for movies by title, genre, release year, or cast. The app provides detailed information about each movie, including synopsis, cast and crew, trailers, and related recommendations.
- Project Demo: <https://react-movie-rating-app-eight.vercel.app/>

Code Editor

- The Code Editor is a web-based code editor platform built using Node.js, Express.js, and Next Js. It aims to replicate the functionalities and user interface of Visual Studio Code, providing developers with a familiar coding environment accessible through a web browser.

E-Commerce Application

- Built a dynamic and responsive user interface using React.js and Redux for state management.
- Integrated with a Node.js backend and MongoDB to handle user authentication, product management, and order processing.
- Implemented client-side validation and error handling to ensure smooth user interactions.
- Collaborated closely with backend developers to optimize API performance and reduce load times.

Task Management Application

- Built a dynamic and responsive user interface using Next.js and Redux for state management.
- Created Features for ticket creation ,Team managing , Task list by Order and much more.
- Integration and API allowing for seamless data exchange and synchronization .
- Ensured secure authentication and authorization mechanisms for user access control.
- Testing to ensure application reliability and performance across various devices and browsers.

Social Media Application

- Tech Stack: Node.js, React, MySQL
- Developed a full-stack social media application enabling users to create profiles, post updates, and engage with other users through likes and comments.Integration and API allowing for seamless data exchange and synchronization .
- Implemented user authentication and authorization using JWT tokens and session management.
- Designed a scalable database schema using MySQL for user profiles, posts, and social interactions.
- Built a dynamic and responsive user interface using React, featuring dark and light mode toggle for improved user experience.
- Integrated RESTful APIs for efficient data management between the front-end and back-end.
- Implemented role-based access control and secure data handling.
