Live Projects

APS - ADVANCED PLANNING SYSTEM

Custom Product Industries Operations

- **Optimizes production** for custom-made products with features like custom product configuration, dynamic scheduling, and efficient inventory management.
- **Enhanced security** with authentication and role-based access control.
- **Real-time monitoring** and advanced resource allocation for scalable and efficient production management.
- **Tech Stack:** C#, React, SQL, AWS, and Ant Design.

Flipkart-VMS

Flipkart Video Monitoring System

- **Contributed to Flipkart VMS**, a video recording facility to help warehouse owners and sellers maintain comprehensive product records.
- **Ensures thorough tracking** of products within the Flipkart ecosystem.
- **Tech Stack:** JAVA, GoLang, SQL, GCP Cloud Services, React, Index DB, and Ant Design.

Steady State

AI (Digital Affiliate Marketing)

- **Developed Steady State**, a platform for Amazon product marketing that uses AI to create promotional videos.
- **Features** include product comparison, competitor analysis, and dynamic optimization for all devices, offering detailed insights and strategies to enhance product visibility and sales.
- **Tech Stack:** GoLang, Next.js 14, Supabase, Postgres SQL, shadcn/ui, Generative AI, and AWS.

Mailmind

Automated Mailing System

- **Contributed to Mailmind**, an AI-based email marketing tool that delivers highly personalized email campaigns.
- **Utilizes AI** to analyze customer data, generate customized content, and optimize email delivery timing for maximum impact.
- **Tech Stack:** Golang, SQL, React, Ant Design, Generative AI, and AWS.
